ADA Compliance

Any individual with a disability requesting a reasonable accommodation in order to participate in a public meeting should contact the ADA Coordinator, Jennifer McMahon, at least 48 hours in advance of the scheduled meeting. The ADA Coordinator can be reached in person at 2 East Main Street, St. Charles, IL, via telephone at (630) 377 4446 or 800 526 0844 (TDD), or via e-mail at jmcmahon@stcharlesil.gov. Every effort will be made to allow for meeting participation. Notices of this meeting were posted consistent with the requirements of 5 ILCS 120/1 et seq. (Open Meetings Act).

MINUTES
CITY OF ST. CHARLES
HISTORIC PRESERVATION COMMISSION
WEDNESDAY, MARCH 19, 2025

Members Present: Smunt, Kessler, Pretz, Rice, Morin, Malay

Members Absent: None

Also Present: Bruce Sylvester, Assistant Director of Community Development

1. Call to Order

Ms. Malay called the meeting to order at 7:00 P.M.

2. Roll Call

Mr. Sylvester called Roll with 6 members present. There was a quorum.

3. Approval of Agenda

No items were added.

A motion was made by Mr. Kessler and seconded by Mr. Pretz with a unanimous voice vote to approve the agenda.

4. Presentation of minutes of the March 5, 2025 meeting

A motion was made by Mr. Kessler and seconded by Dr. Smunt with a unanimous voice vote to approve the minutes as presented. Ms. Malay abstained.

5. Certificate of Appropriateness (COA) applications

a. 521 W. Main St.

Bruce George, Charles Vincent George Architects, presented COA request to approve building addition, parking lot reconfiguration, and small shed to be added in back of lot.

Commission discussed the style of the building. Dr. Smunt added keeping the gable pitch to match the original building, using electric lanterns as lighting are appropriate fixtures, using traditional Midwest window gives it a folk flavor.

Mr. Kessler asked about the storage shed in back and the trash enclosure being separate. Mr. George responded that they will be separate. The trash enclosure will be surrounded by a picket fence.

Ms. Morin commented on the addition being white, the arched windows, and cupola gives the feeling of a church.

Mr. Pretz liked that the architect was present for the presentation of the project should the Commission have any challenges with the design.

Ms. Malay asked if the addition and outbuildings have been reviewed by Staff and is the lot coverage as presented good. Mr. Sylvester responded that a permit has not been applied for yet. Once the permit application has been submitted City Planners will do a zoning review which will review the lot coverage of the project.

Mr. Kessler suggested tabling the approval until a permit has been submitted.

Mr. George asked if the Commission could do a vote for approval before the permit submission.

Mr. Kessler explained that the Commission requires a full plan set for the final approval of COA.

Dr. Smunt suggested a preliminary approval based on information presented and pending Building Department review in order to move the process forward which received unanimous agreement by the Commission.

A motion was made by Mr. Kessler and seconded by Mr. Pretz with a unanimous voice vote to table approval until submittal of permit application.

6. Grant Applications

None.

7. Landmark Applications

None.

8. Preliminary Reviews- Open forum for questions or presentation of preliminary concepts to the Commission for feedback

a. 504 E. Main St.

Mr. Joe Freeman requested suggestions from the Commission for property he is currently under contract to purchase at 504 E. Main Street. Mr. Freeman explained the current condition of the property and the work he would like to do on the property including replacing the siding with a Hardie Board type siding, architectural roof shingles, and replacing windows.

Ms. Rice stated the front porch of the home appears to be an addition. Dr. Smunt added the porch and the back of the home on the north side are additions. The original home is of the Italianate style. Dr. Smunt suggested keeping with that style. The pediment above the front door is Colonial Revival and suggested removing and replacing with the Italianate style.

Mr. Pretz added this building is the Steven S. Jones building. He had the southern portion of the building as his house and connected to that was his law office which is now part of Camp Kane.

Mr. Kessler suggested a site visit with Mr. Freeman and the Commission. Together they could work up a plan on the renovation of the property. Mr. Freeman added a site visit would be beneficial and will reach out to Russell Colby to schedule.

9. Other Commission Business

None.

10. Public Comment

Al Watts, Preservation Partners of Fox Valley, questioned the property at 1207 E Main Street which had previously been boarded up. He questioned if this property should be considered for historic landmarking even though it is not in an historic district. Mr. Pretz added that he had looked into the 2 homes on this property and they are not as old as they appear. Nothing he found suggested any historic character has lived in the buildings.

The Beith House will be 175 years old this year.

11. Additional Business and Observations from Commissioners or Staff

Mr. Kessler commented that Maple Leaf Roasters has added a vestibule but had not come before the Commission. Mr. Kessler questioned if they had obtained a permit. Mr. Sylvester said he would look into if a permit had been issued for the vestibule.

12. Meeting Announcements: April 2, 2025

13. Adjournment

With no further business to discuss the meeting adjourned at 8:08 P.M.

Material and Labor

We propose hereby to furnish material and labor - complete in accordance with the above specifications for the price listed above. All material is guaranteed to be as specified. All work is to be completed in a workmanlike manner according to standard practices. All project related debris will be removed and hauled away from the premises. You as the homeowner are required and expected to confirm all materials listed above. The materials will be ordered based off of the specifications listed.

Additional Costs and Exceptions

Any alterations or deviation from the above specifications involving extra material or labor costs will be executed only upon written orders. The specified changes will be completed at extra charge over and above the original estimate.

Any and all rotted or damaged substructure will be repaired at additional cost equal to no more than 10 (ten) percent over the cost of material and labor required to complete the work in a satisfactory manner.

Insurance, Liability, Lead Safe, and Misc.

All agreements contingent upon strikes, accidents, or delays beyond our control. Home owner or authorized party is to carry fire, tornado & other necessary insurance.

Advanced Windows & Siding Inc. carries necessary liability & workers compensation insurance. An updated copy may be furnished for the home owner upon request (\$50 fee if additionally insured is requested).

Any lead safe analysis or renovation will be charged at an additional price. This price is determined by the size, scope, and type of work being performed.

In the unlikely event that any property, fixture, or accessory around the area of work is damaged, you must contact Advanced Windows & Siding Inc. for inspection and assessment. Should any repair or service be performed without inspection from Advanced Windows & Siding Inc., the homeowner is solely and fully responsible for any and all expenses related to the repair.

Any photos taken by Advanced Windows & Siding, Inc. and its representatives before, during, or after the completion of work are the sole property of Advanced Windows & Siding, Inc. These photos may be used for any and all advertising or publications. Your signature below waives your right to ownership of these photos and their use. Photos will no longer be used upon written request of the homeowner.

Payment Terms, Mechanics Lien, and Right to Withdraw

Payment is to be made as follows: Payment Upon Completion (completion determined by the Authorized Advanced Windows & Siding Inc. Representative listed on the proposal) *All prices listed are cash/check prices.*

There is a 4% additional charge for payment made by credit card or debit card.

Advanced Windows & Siding Inc. reserves the right to a mechanics lien under Illinois Law. The home owner or authorized agent for the product is fully responsible for any and all lien charges or expenses.

This proposal may be withdrawn by Advanced Windows & Siding Inc. within 30 days. Extension of the proposal is available upon request; Advanced Windows & Siding Inc. has a right to deny any and all requests for extension.

A \$250.00 fee will be charged for any contract cancelled prior to ordering material. If cancellation is more than 24 hours after material has been ordered, you as the homeowner are responsible for 60% of the total job cost.

Acceptance of Proposal

The above prices, specifications and conditions are satisfactory and hereby accepted. You are authorizing Advanced Windows & Siding Inc. to furnish the above specified material and complete the work as specified. You agree to make payment as outlined above.

Project Description:				
<p>The Fire Department Emergency Management Agency is proposing to install a severe weather siren on a new pole adjacent to the municipal parking lot located east of N. Riverside Ave.</p> <p>The siren is a replacement for an old siren located in the cupola of the old City Hall building. This siren is no longer functional.</p> <p>Fire Dept. and Public Works reviewed numerous locations within the immediate area and most presented overhead or underground conflicts. This location was determined to be viable and also is located in an area with other overhead utility poles.</p> <p>The pole and siren would reach approximately 52 ft. in height. This height is similar to the electric poles in the immediate vicinity.</p>

Rods shall be buried 6" below grade. 		

SITE DRAWING / SKETCH:

► Model 2001-130 and Equinox

High Power, Directional Rotating Siren

The Federal Signal 2001-130 and Equinox siren is a high power, rotating, unidirectional outdoor warning siren. The high-decibel output provides maximum coverage with minimum installation cost. Radio/cellular/satellite or wireless IP activation can further minimize installation costs by eliminating the need for leased dedicated control lines.

The siren's projector produces a 60-degree projection of sound which rotates at 3 RPM and can produce three distinct warning signals: steady, wail and fast wail. The siren will supply a minimum of 15 minutes of full power output from its batteries after AC power loss. The siren controls are available with battery operation, solar, AC operation, and AC operation with battery back-up, one-way and two-way radio control, wired or wireless Ethernet, satellite/cellular or landline. The 2001 Series is offered in low frequency (500 Hz) or mid-range frequency (790 Hz).

Ideal applications for this warning siren include hazardous weather conditions, fires, floods, chemical spills and other types of community or facility emergencies.

FEATURES

- High-powered rotating siren for maximum coverage
- Available in low and mid-range frequency
- Three distinct warning signals
- AC or Solar powered with battery operation or back-up
- Weather-resistant coating

High Power, Directional Rotating Siren (2001-130/Equinox)

SPECIFICATIONS

Power:

Sirens can be powered from 120VAC, 240VAC, with battery back-up or battery operation. Solar powering can also be provided

Signal Information:	2001-130	Equinox
Signal /Sweep Rate	Frequency Range	500 Hz
Steady /Continuous	790 Hz	
Wail /10 sec.	470-790 Hz	180-500 Hz
Fast Wail /3.5 sec.	600-790 Hz	300-500 Hz
Coverage: ¹	2001-130	Equinox
70dB	Up to 6,500'	Up to 6,100'
60dB	Up to 13,200'	Up to 12,200'

Pole Mounts:

Wood, steel, composite or concrete poles can be provided.

Contact Federal Signal for details

Communications:

Federal Signal can supply one-way and two-way communications.

Radio, IP, Landline, Satellite and Cellular can be combined to provide a robust alerting solution

Operating Temperature: -22°F to 140°F -30°C to 60°C

Dimensions H x W x D 62" x 37" x 41"
(157 cm x 94 cm x 104 cm)

Net Weight	420 lbs	190 kg
Shipping Weight	460 lbs	205 kg
Equinox Net Weight	390 pounds	159 kg
Equinox Shipping Weight	460 pounds	205 kg

HOW TO ORDER

Contact our Federal Signal Sales Engineers to design a system that meets your specific requirements.

Description Part Number

Siren Ordering Information:

Rotating electro-mechanical siren, 130 dBc +/- 1dBc @ 100' (30.5m) 48VDC, pole mount included 2001-130

Rotating electro-mechanical siren, low frequency, 125 dBc +/- 1dBc @ 100' (30.5m) 48VDC, pole mount included Equinox

Siren Control Ordering Information:

One-way FC Controller, 120VAC operation FC/H/U

Two-way FC Controller, 120VAC operation FCTBD/H/U

One-way FC Controller, 120VAC to battery operation DCFCB/H/U¹

Two-way FC Controller, 120VAC to battery operation DCFCTBD/H/U¹

Command and Control for Multiple Siren Installation:

Console for siren activation (R for rack mount) SS2000+/R

Commander software for PC based siren activation, monitoring and control SFCD⁵

Contact Federal Signal for powering options

¹ Actual coverage is dependent on many factors, contact Federal Signal for sound analysis of your specific location

¹ The siren can operate throughout the temperature range provided that battery temperature is maintained at 18°C or higher

¹ Batteries not included

⁵ See product page for additional information

NOTE - SEE DRAWING #IK-2001ACDC-TP FOR POLE INSTALLATION DETAILS.

► Model DCFCTBD

Two-Way Digital Controller for Electro-Mechanical Sirens

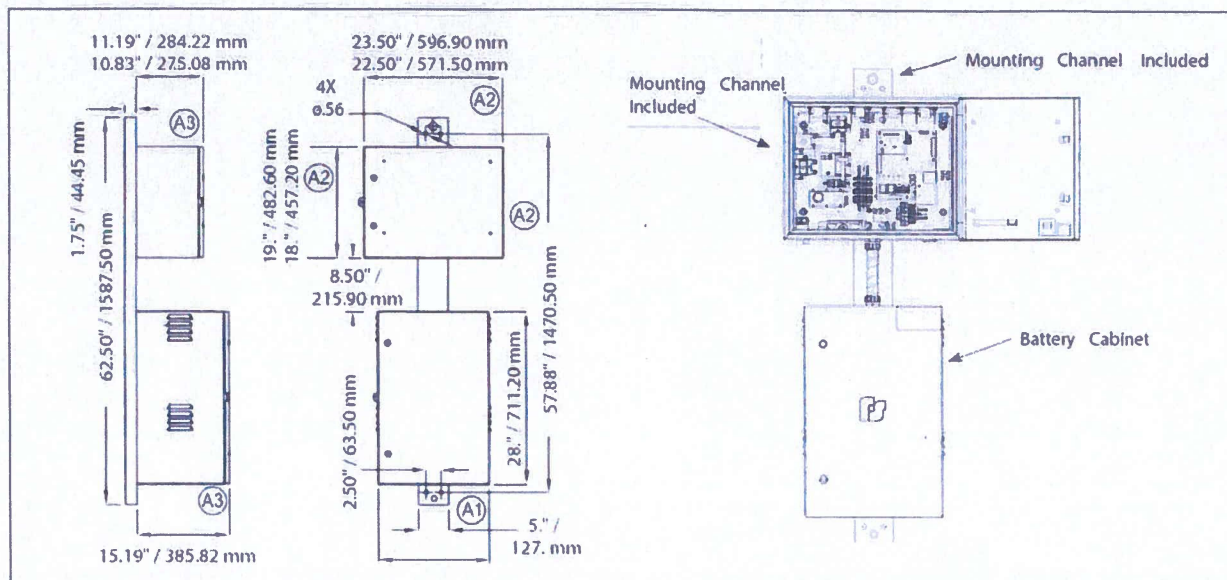

Federal Signal DCFCTBD siren controllers are two-way digital, battery-operated/backup and status monitoring systems for use with the Federal Signal 2001-130, Equinox, 508-128, and Eclipse8 sirens. The DCFCTBD siren controller typically interfaces with off-the-shelf two-way radio transceivers and communicates to a base controller. DCFCTBD siren controllers can be used with radios utilizing single-tone, two-tone sequential, DTMF, POCSAG, AFSK, EAS, and digital formats such as P25 and Tetra. The DCFCTBD controllers can be equipped with optional communications such as landline, IP, fiber, satellite, and cellular. This makes DCFCTBD siren controllers compatible with virtually any existing siren control system or communication method. There are four local inputs, four local buttons for activation, and a reset option.

DCFCTBD models come equipped with four independent relay outputs that can be programmed to activate with local inputs, local buttons, or via the communications channels. Activation codes, relay timing, and optional warning sounds are programmed into the unit through a standard RS232 serial port or over-the-air from the central control point. The DCFCTBD siren controller offers six user-programmable functions in addition to the five pre-set functions (arm, disarm, report, growl test, and master reset). These controllers include sensors to supply information on the following areas of operation: AC power status, communications status, low battery status, intrusion, siren activation, current intrusion, siren rotation, and local activation.

FEATURES

- Two-way siren controller for 48 Vdc Sirens
- Two-way radio control and status monitoring
- Simultaneous two-tone sequential, DTMF, EAS, POCSAG, and digital AFSK decoding for security
- Able to utilize multiple communication paths for redundancy
- Controls mechanical sirens, including models 2001-130, Equinox, 508-128, and Eclipse8
- Solar options available
- Buttons for local activation
- Landline, Ethernet (IP), or radio control
- UL Listed for general signaling
- DNV Certified

Two-Way Digital Controller for Electromechanical Sirens (DCFCTBD)

SPECIFICATIONS

Operating Temperature:	-22° to 149°F (-30° to +65°C)
AC supply voltage:	120 Vac at 4.0 A 240 Vac at 2.0 A
Battery Backup:	48 Vdc
Current Draw:	+/- 10%, 50/60 Hz, max standby current
DCFCTBD Power Supply:	6 A at 13.3 Vdc
Battery Backup:	48 Vdc
Current Draw:	0.2 A in standby
Programmable Frequency:	Federal Signal can program your radio to your specific requirements
EAS:	Supports standard EAS codes and wildcards
POCSAG:	Supports binary AFSK 512 Baud numeric messages
4 relay outputs:	SPST
Contact Rating:	(4 relays standard) 5 A at 28 Vdc – 8 A at 240 Vac
Shipping Weight:	
DCFCTB Total Weight (including batteries):	364 lb (165 kg)
Shipping Weight (excluding batteries):	300 lb (136 kg)
2001TRB/2001TRBP Net Weight:	150 lb (68 kg)
2001TRB/2001TRBP Shipping Weight:	190 lb (86.2 kg)

ACCESSORIES

Description	Part Number

	Preliminary Review		Grant	
X	Certificate of Appropriateness (COA)		Other Commission Business	
	Landmark/District Designation		Commission Business	
Attached Documents:		Additional Requested Documents:		
Approved Plans, Photos, Email summary w/photos				
Project Description:				
<p>After a number of reviews, the Commission approved a COA for reconstruction of the porch on 2/19/25, with conditions. Those conditions were addressed in a revised permit submittal dated 3/6/25. The building permit was issued based upon these plans (attached).</p> <p>Per the applicant, based upon conditions encountered, the contractor made changes during the course of construction. Specifically:</p> <ul style="list-style-type: none"> • Use of replacement columns, due to unforeseen deterioration of the existing columns. • Reducing the width of the stairs to follow the previously existing width, based upon the size of the existing concrete stoop and impact to the asphalt driveway. (If stairs remain as constructed, the handrail design will need to be revised to include a newel post and side rail connecting to the columns.) <p>The applicant indicated that the lattice will be framed.</p>				
Staff Comments:				
<p>A stop work order has been issued and no further inspections can take place until the project is brought into compliance with the permit plans.</p> <p>The applicant is presenting information on the conditions encountered to seek a revision to the COA approval.</p>				
Recommendation / Suggested Action:				
<ul style="list-style-type: none"> • Provide feedback and recommendation on approval of the COA

Subject: 213 S. 3rd st. st. Charles IL
Date: Monday, March 31, 2025 11:34:12 AM

These are some pictures of the damages the columns had in the interior. Like I said, last time we had our conversation, the first time when we did the deck inspection before the demolition, we checked the columns and from the exterior they seemed still very strong and in perfect shape. But once the started taking them down, that when we noticed that the interior part was rotten and there we visible sign of wood spreading/ wood separation. This issue is mainly caused by years of humidity, moisture, poor ventilation, there wasn't much to do to repair those issues. So we decided to replace them with wooden columns, which is the same material used in the original deck design. As for the steps we did our best to meet the structural plans but in order for us to do it we would have to break the driveway are make larger repairs to it. Here are the pictures that show how much we would need to break and repair, it is a significant amount and it is pretty deep.

Expansion

Rotten wood
