STCHARLESIL.GOV

Dear Resident,

The City of St. Charles is entering the final phase of construction for the new water main installation along Ohio Avenue and Kautz Road. This project is part of the City's ongoing efforts to expand and enhance its water treatment capacity.

Construction activities are scheduled to begin the week of March 16, 2026, and are anticipated to continue through the week of April 6, 2026. During this period, detours and temporary lane closures will be in effect (see attached for details).

Contractor and Inspector

The contract has been awarded to Linden and Sons of Des Plaines, IL. Trotter and Associates will serve as the on-site engineering firm, conducting construction inspections and acting as a liaison between the City and local residents or property owners.

Right-of-Way

All work will occur within the City's right-of-way. If you have private property features such as sprinklers, landscaping, brick driveways, or electronic dog fences within this area, please remove or protect them as soon as possible. The City is *not* responsible for damage to personal property left in the public right-of-way.

Mail & Garbage Service

Mail and garbage collection services will not be interrupted during construction.
