Commercial or Industrial: Alteration or Repair

Building & Code Enforcement Division
2 East Main Street
St. Charles IL 60174
630.377.4406 (Office) 630.443.4638 (Fax)
<http://www.stcharlesil.gov>

Please direct any and all questions to the City of St. Charles Building & Code Enforcement Division:
Monday through Friday (8 AM to 4:30 PM) at 630.377.4406

A building permit is required prior to any construction of an industrial or commercial alteration or repair. The following are guidelines and comments for obtaining a building permit.

Application and Drawings Procedures

Interior Alteration or Repair

- ❑ An application is to be filled out and submitted to the Building & Code Enforcement. The contractors names, addresses, phone numbers and, if required, their license numbers are to be filled out when submitting the application.
- ❑ Three (3) sets of drawings sealed by an Illinois registered architect, showing the construction or remodeling details, are to be submitted with the application.
- ❑ An Electric Service application - If applicable must be completed and submitted with the application. In addition, any electrical work pertaining to the electric service the Electric Service Application must be accompanied by four (4) sets of drawings showing the complete electric service including a one-line service diagram, electric panel schedules and site location of utility transformer, sealed by a professional engineer or qualified architect are to be submitted with the original application. St. Charles Municipal Electric Utility Application must be original; no fax copies are acceptable.
- ❑ The Building & Code Enforcement Division and the Fire Prevention Bureau will conduct the review for interior alterations, remodel, or repair. Questions for the Building Zoning review should be addressed to our office at 630/377-4406. Questions for the Fire Prevention review should be addressed to their office at 630/377-4457.

Application – Permit Fees: *(All payments are to be made either in the form of cash, check, or money order)*

Interior Alteration or Repair

- ⇒ A **filing fee of \$370.00** is to be paid at time of submission of application and plans.
 - Additional fees for your permit are to be paid at the time the permit is approved and ready to be obtained.
 - Alterations are based upon estimated cost:
 - \$4,001 to \$24,000 at \$6.75 each/1,000
 - \$24,001 and above \$3.10 each/1,000
 - **Additional fees for utility connections, if required, such as electric, water, sewer connections or water meters are to be paid at the time the permit is approved.**
- ⇒ **Re-inspection fee.** During the construction of your project should you fail any of the required inspections there is a re-inspection charge. The fees are due prior to certificate of occupancy. The fee schedule is as follows;
 - \$65.00 per Building Department re-inspection for all types of inspections during construction (excluding finals)
 - \$80.00 per Fire Department re-inspection for all types of inspections during construction (excluding finals)
 - \$170.00 per re-inspection for all industrial, commercial, business and other non-residential final inspections.
- ⇒ **Temporary certificate of occupancies.** \$160.00 is due prior to issuance of a temporary certificate of occupancy for all industrial, commercial, business and other non-residential final inspections.

Consultation meetings:

The Building and Code Enforcement Division offers a consultation meeting where you will meet with City staff and discuss any questions or issues on your construction project. The meeting may be for a proposed project or a project that is currently under construction and can be held at the site location or in our office. To schedule this meeting, please contact our office at 630.377.4406.

Building Codes

The following are the Building Codes, which the City of St. Charles has adopted:

- St. Charles Municipal Code
- 2009 Int'l Building Code w/revisions
- 2009 Int'l Mechanical Code w/revisions
- 2008 Nat'l Electrical Code w/revisions
- 2004 IL State Plumbing Code w/revisions
- 2009 Int'l Fuel Gas Code w/revisions
- 2009 Int'l Fire Codes w/revisions
- 2012 Int'l Energy Conservation Code
- IL Accessibility Codes
- NFPA Life Safety Code 101

Inspections

The following is a list of inspections, which might be required for your project and the amount of time for the inspection.

- △ **Electric *** Approximately 1-hour and this is usually conducted with the framing inspection.
- △ **Frame *** Approximately 1-hour and this is usually conducted with the framing inspection
- △ **Ceiling Grid** Approximately 1-hour
- △ **Rough Plumbing** Approximately 1-hour
- △ **Insulation** Approximately 1-hour
- △ **Mechanical/HVAC** Approximately 1-hour
- △ **Final** Approximately 1 to 1and ½ hour and is conducted with the Fire Prevention Bureau

*Frame and/or electric inspections will only be scheduled after all required plans have been submitted to the Fire Marshall.

Overtime Inspections:

The Building & Code Enforcement Division Manager or his designee may approve requests for overtime inspections for unique circumstances. The charge for an overtime inspection will be a separate charge and will be invoiced to the individual contractor or company who requested the overtime inspection.

Fire Prevention Inspections

- ▽ Full flow flush
- ▽ Underground fire supply pressure test
- ▽ Above ground sprinkler test(s)
- ▽ Kitchen fire suppression system
- ▽ Smoke evacuation test
- ▽ Emergency generator testing
- ▽ Fire alarm test
- ▽ Final Occupancy Inspection

Engineering Inspections

- Public water main
- Public sanitary sewer (air, mandrel, TV)
- Sidewalk, driveway and parkway
- Roadway repair/construction
- Grading – only after as-built received

General Comments

1. Compliance with above indicated codes, ordinances, and inspections required.
2. The plan review and stamped "FIELD COPY" of the plans are to be on the job site.
3. Minimum of 24-hour notice is required when scheduling any inspections.
4. Engineer shall certify the final grading of the site is in substantial compliance with the approved grading plan.
5. It is the responsibility of the general contractor to provide all sub-contractors with copies of all review comments and the required inspections which are needed.
6. Location of the electric service and transformer to be approved by the City's Electric Department (630/377-4407).
7. Electric water cooler shall comply with ANSI Section 4.15 and the Illinois State Plumbing Code 2004 Edition.
8. Each building/tenant space shall have one (1) main means of disconnecting the electrical service conductors from the building/tenant space.
9. Where an external main disconnect is not "readily accessible", an additional main disconnect must be installed inside building.
10. Utility Conduit to be no less than five (5") inches per City's specification.
11. One (1) line riser diagram of electric service is to be posted by main switchgear inside building.
12. Conductors entering the transformer shall be below the manufacturers mark line on the inside front panel of transformer. If the manufacturers mark has been removed, the conductors are to be below coils of transformer.
13. Provide a 15 or 20 amp G.F.I. receptacle outlet in an accessible location on the roof for serving the HVAC roof top units. The receptacles shall be on the same roof level and within 25 feet of the units. The receptacle outlets shall not be connected to the load side of the equipment disconnecting means.
14. All floor level area electric outlet receptacles are to be a minimum of 15 inches from finished floor to bottom of electric outlet.
15. Underground DWV system shall be no less than four (4") inch cast iron or Schedule 40 PVC and shall be tested with no less than a ten (10) foot head of water.
16. Above ground DWV system shall be no less than schedule 40 or cell-core PVC and shall be tested to top of stack or point of the connection into existing stack.
17. Underground domestic water distribution system inside the building shall be no less than type K copper, above ground no less than M copper and shall be tested at no less than 100 PSI. Water used for testing shall be from potable source.
18. Potable water piping system shall be disinfected in accordance to Section 890.1180 of the Illinois State Plumbing Code, 2004 Edition.
19. Provide a by pass with locking valve around all water meters larger than one (1") inch. By pass to be same size as domestic water service, but in no case less than one (1") inch.
20. A reduced pressure backflow preventer (RP-BFP) listed by and bearing a label or seal of a nationally recognized testing laboratory as listed in Section 890 Appendix A Table A 39 of the Illinois State Plumbing Code 2004 Edition shall be installed between the potable water supply and the fire sprinkler system. (RP-BFP) to be installed inside building as close to the entrance of the potable water supply as possible and shall be placed so that it is readily accessible for inspection, testing, maintenance and/or replacement. A floor drain sized to accommodate any discharge from the (RP-BFP) shall be installed as close as possible to the (RP-BFP). The drain line from the reduced pressure backflow preventer shall waste into the sanitary drainage system through an air gap.
21. Any lawn sprinkler system connected to the municipal water supply shall be equipped with a RP-BFP listed and bearing a label or seal of a nationally recognized testing laboratory as listed in Section 890 Appendix A Table A39 of the Illinois State Plumbing Code 2004 Edition installed on the service side of the water meter serving the lawn sprinkler system.
22. A (RP-BFP) listed by and bearing a label or seal of a nationally recognized testing laboratory as listed in Section 890 Appendix A Table A 39 of the Illinois State Plumbing Code 2004 Edition shall be installed in the potable water supply inside the building as close to the entrance of the potable water service as possible and shall be placed so that it is readily accessible for inspection, testing and maintenance and/or replacement.
23. All reduced pressure backflow preventers (RP-BFP) shall waste to a floor drain sized to accommodate any discharge from the (RP-BFP). The drain line shall waste into the sanitary drainage system through an air gap.
24. Plumbing fixtures shall comply with Section 890 Appendix A Table A "Approved Materials and Standards for Plumbing Fixtures and Fixture Fittings."
25. Plumbing fixtures shall comply with Section 890.610 General Requirements - Material and Design."
26. Domestic water supply to boilers to be equipped with a backflow preventer conforming to ANSI/ASSE No. 1017-1999 CSA B64-2001 Standards.

General Comments, continued

27. All mechanical equipment, such as HVAC units, refrigeration units, and pool equipment located on the roof of any structure in any zoning district shall be screened from view from public streets and adjoining residential dwellings by its location on the roof (away from the parapet), by an architectural element of the building (e.g. a parapet), by a screening wall that is compatible with materials of the building, or a combination thereof.
28. An occupancy certificate shall not be issued until all items listed on the Building & Code Enforcement; Fire Prevention, Planning, and Development Engineering, or other various Department's Permit Conditions have been addressed and approved.

One phone call to J.U.L.I.E. (1-800-892-0123) 48 hours prior to digging will notify all of the following public utilities. These service utilities need to be located and marked by utility representatives prior to starting any excavation, grading, or other work that is below the ground surface. You will receive a Dig Number, which you should record above along with the date of notification.

Utility	Color Code Marker
