II. OVERVIEW

A. BACKGROUND

The 15-acre subject property encompasses five parcels west of S. Tyler Rd., accessed from Munhall Ave. The parcels are under common ownership. Three of the parcels (13.5 acres) are farmed. A single-family house addressed as 872 Munhall Ave. is constructed on one of the parcels, with the last small parcel extending out from the house's lot towards Tyler Rd.

B. PROPOSAL

Court Airhart of Airhart Construction Corp. is seeking feedback on a Concept Plan to develop a single-family subdivision on the property. Details of the proposal are as follows:

- Demolition of the existing house.
- 51 single-family home lots
 - Two types of lots:
 - Narrow Lots (typical 53' x 119') – 6,307 sf min. lot size.
 - Wide Lots (typical 74' x 95') – 7,030 sf min. lot size.
 - Variety of single- and two-story home models (1,400-3,000 sf; 2-4 bedrooms).
- Two stormwater detention areas with adjacent “pocket parks”.
- Looped public street configuration with sidewalks on both sides of the street.
- Potential for future connection to South Ave. to the west.

C. CONCEPT PLAN REVIEW PROCESS

The purpose of the Concept Plan review is to enable the applicant to obtain informal input on a concept prior to spending considerable time and expense in the preparation of detailed plans and architectural drawings. The Concept Plan process also serves as a forum for citizens and owners of neighboring property to ask questions and express their concerns and views regarding the potential development. Following the conclusion of the Concept Plan review, the developer can decide whether to formally pursue the project.

III. ANALYSIS

A. COMPREHENSIVE PLAN

The Land Use Plan adopted as part of the 2013 Comprehensive Plan identifies the four parcels of the subject property fronting Munhall Ave. as “Single-Family Detached Residential”, consistent with the proposed land use. However, the rear parcel is identified as “Industrial/Business Park”.

Single-Family Detached Residential is described in the plan as follows (p. 38):

Single family detached residential areas should

consist primarily of single family detached homes on lots subdivided and platted in an organized and planned manner. Downtown, single family residential areas consist primarily of older buildings, many rehabilitated, with small yards and minimal garage space. Single family residential detached homes are the most prevalent building type in the community, and should continue to be so.

The Industrial/Business Park land use category is described in the plan as follows (p.39):
Areas designated for industrial/business park are intended to accommodate a variety of uses ranging from light assembly, storage and distribution, low intensity fabrication operations, research and “tech” industry applications, intense commercial service uses, and more. These areas are also intended to provide for business park/office park uses, which could include “stand alone” office buildings and complexes or several buildings incorporated into a “campus like” setting.

The plan notes these areas are located in areas, “...where they can capitalize on close proximity to regional transportation networks while minimizing negative impacts on residential neighborhoods. (p.47)”

The Plan provides the following Residential land use policies relevant to the proposed development: (p. 44):

Prioritize infill development over annexation and development. While the era of substantial residential growth is over in St. Charles, there remain some isolated opportunities for residential development on the City’s west side. While most of these opportunities are within unincorporated Kane County, they fall within the City’s 1.5-mile extraterritorial planning jurisdiction defined by State statute. It is recommended that the City carefully consider annexation and growth into these areas while vacant and/or underutilized residential properties exist within the City’s boundaries. When residential development does occur within the City’s growth areas, it should occur in areas immediately adjacent to existing developed areas so as to prevent “leap frog” development and the resulting costs and burdens of unnecessarily extending infrastructure systems in an unwise manner.

Ensure residential areas are adequately screened/ buffered from adjacent non-residential uses and activity. The composition of the City’s commercial districts along corridors that transect the City means that there are many areas where commercial uses abut residential properties and neighborhoods. The use of horizontal and vertical buffering and screening, including berms, fencing, and landscaping, should be promoted to protect neighborhoods from abutting commercial or industrial land uses. The City should identify areas where land use conflicts are problematic and explore solutions to mitigate the conflicts, including buffering and screening. Additionally, the City’s landscape ordinance could be revised to require enhanced screening and an amortization schedule to ensure compliance for non-conforming properties within a set time frame.

B. ZONING REVIEW

The subject property is zoned RS-4 Suburban Single-Family Residential and M-2 Limited Manufacturing. Proposed is rezoning the portion of the property zoned M-2 to RS-4. The purpose of the RS-4 District as stated in the Zoning Ordinance is:

“To accommodate medium to high-density single-family residential development in the City. The minimum lot size in this district is six thousand six hundred (6,600) square feet. The RS-4 District also provides for limited institutional uses compatible with surrounding residential neighborhoods.”

RS-4 zoning is consistent with the adjacent residential neighborhood to the south of the subject property. This subdivision was platted in the late 1970s and is known as Cambridge.

The applicant is also proposing to establish a PUD to accommodate four zoning deviations. The table below compares the RS-4 District requirements with the Concept Plan. Zoning deviations that would be required are denoted in ***bold italics***.

	RS-4	Concept Plan
Min. Lot Area	6,600 sf	<i>6,307 sf</i> (lot sizes vary; average lot area: 8,093 sf)
Min. Lot Width	60 ft.	<i>53 ft.</i> (lot widths vary; average lot width: 67.3 ft.)
Max. Building Coverage	30%	<i>37.5%</i>
Max. Building Height	34 ft. / 2 stories, whichever is less	32 ft.
Min. Front Yard	20 ft.	20 ft.
Min. Exterior Side Yard	15 ft.	15 ft.
Min. Interior Side Yard	Combined width of 14 ft., neighbor less than 5 ft.	<i>Combined width of 12 ft., neither side less than 6 ft.</i>
Min. Rear Yard	30 ft.	30 ft.

C. LANDSCAPING

A landscape plan will be required for any common areas. This includes the detention ponds and surrounding open space. The application materials indicate a homeowners' association will be created for the subdivision. It is assumed the ponds/open space will be established on a plat of subdivision as HOA-owned/maintained lots.

A landscape buffer is not required for the RS-4 district. However, the property is adjacent to industrial zoning which would have been required to provide a landscape buffer if developed after the residential. Since no buffer is provided on the industrial lots, if developed after the residential, the industrial property would be required to provide a buffer. The application indicates the developer will provide a landscape package for each lot. Trees are depicted along the rear lot lines on the conceptual site plan which will help to provide a minimal buffer between adjacent non-residential uses. Privacy fencing should also be considered for additional screening.

D. BUILDING ARCHITECTURE

The applicant has submitted a number of home model designs intended to be offered for the proposed development for the Plan Commission's information. Note buildings in the RS-4 district are not subject to Design Review, nor are architectural plans required to be approved as part of a single-family residential PUD.

E. ADJACENT CITY PROPERTY

The City of St. Charles owns a parcel adjacent to the west of the subject property. Proposed Lots 20-24 back up to the City property. Known as the Public Works Annex, the property is predominately used for material storage and debris staging. Due to the activities that occur on the property and the hours of operation, there is some potential for concerns and/or complaints from residents of Munhall Glen, should the development move forward. Public Works provided the following information about use of the Annex:

The City keeps a stockpile of black dirt, brick pavers, stone, and mulch on site, as well as downtown streetscape furniture (benches and trash cans), barricades, and seasonal equipment. In addition, this yard is used as a staging site for spoils from roadway construction jobs, underground construction or repair, as well as the City's forestry operations. The site is predominantly accessed between the hours of 6:30 AM and 3:00 PM Monday through Friday; however, the site may be utilized on a 24 hour basis on any given day throughout the year to facilitate special events and emergency operations (road closures, watermain breaks, fallen trees, sewer failures, etc.).

F. SITE ACCESS/STREET IMPROVEMENTS

One access to the development is proposed from Munhall Ave. The looped street is proposed as a public street. Proposed ROW width is 60 ft. with 26 ft. pavement. A pavement width of 27 ft. (measured at face of curb) is needed, which would allow parking on one side of the street. A ROW of 66 ft. is typically required for single-family subdivisions of this size, however the proposed design may be acceptable with adequate front yard utility easements to accommodate utilities, as needed.

The Fire Code requires single-family developments in excess of 30 units to incorporate two approved fire apparatus access roads. An additional means of access will be required in addition to the Munhall Ave. access. The concept plan depicts a 60 ft. wide lot for a possible west roadway connection to South Ave. This connection will need to be incorporated into the development either as a full access or a fire access road. Fire access roads must be at least 20 ft. wide and shall be paved and maintained during winter months.

If a full roadway connection were made to South Ave., it would provide required emergency access as well promote neighborhood connectivity and provide residents with a more convenient route to downtown. Any access, either emergency-only or full access, will require South Ave. to be improved with a new roadway from the edge of the subject property to approximately the entrance of the Public Works facility, since that stretch of South Ave. is not currently paved.

G. ENGINEERING REVIEW

Engineering comments on the Concept Plan have been provided to the developer. Items raised will need to be addressed in the PUD Preliminary Plan submittal, should the development move forward.

Staff has noted the following pertinent comment related to landscaping:

- Areas along the rear lot lines are usually reserved for drainage purposes. The Concept Plan depicts trees along the rear lot lines. Future grading and landscape plans will need to be coordinated.

E. INCLUSIONARY HOUSING

This development will be subject to the Inclusionary Housing Ordinance, Title 19 of the City Code. A fee worksheet has been submitted indicating the applicant's intent to pay a fee in-lieu of providing 5 affordable units. Based on a fee in-lieu amount of \$39,665.75 per required affordable unit, a total fee in-lieu amount of \$198,328.75 would be due at the time of building permit. The applicant has submitted a letter stating concerns about the fee and requesting the City consider removing or reducing the fee for this project. The fee is set on an annual basis by the City Council with input from the Housing Commission.

F. SCHOOL AND PARK FEE-IN-LIEU CONTRIBUTIONS

The applicant will be required to provide the School and Park Districts with a cash contribution in lieu of physical land per the standards established in the Subdivision Code, Chapter 16.10 "Dedications". A credit will be granted for the existing dwelling unit. The resulting fees are required to be paid before the building permit is issued for the first house.

The applicant has submitted letters asking the City to considering reducing the School and Park land-cash fees for this project. Based on the type of product and family size of the developer's anticipated buyer, they believe the school and park populations would be more accurately estimated by using the figures for attached instead of detached units.

The applicant's letters have been provided to the School and Park districts for feedback. The School District has responded that in the past, they have not varied the population estimate for a development unless there are specific age restrictions associated with it, along with assurances that the age restrictions will remain in place in the future.

The Park District has responded that the Land-Cash ordinance does not contain provisions for adjusting the population estimate based on an intended market. They also noted that age does not decrease the need for park district facilities and programs and referenced that in 2019, the Adult Activity Center at Pottawatomie Community Center had over 14,000 resident check-ins for the various programs offered. Although there are some pocket parks and open space in the development, the park district will serve the overall recreational needs of the future residents.

IV. FUTURE APPROVAL PROCESS

If the applicant chooses to move forward with the proposed development at the conclusion of the Concept Plan process, the following zoning/subdivision approvals would be necessary:

1. Special Use for PUD: To establish a PUD ordinance with unique zoning standards to accommodate the proposal.
2. PUD Preliminary Plan: To approve the physical development of the property, including site, engineering, and landscape plans.
3. Preliminary/Final Plat of Subdivision: To plat and divide the property.

V. PLAN COMMISSION REVIEW

Plan Commission reviewed the Concept Plan on 6/2/20. Comments are summarized as follows:

- General support for single-family land use.

- A roadway connection to South Ave. should be incorporated into the plans to promote public safety, accessibility and mobility.
- Mature, high-quality trees on the site should be preserved where possible.
- Additional open space should be incorporated where possible.
- Concerns were expressed about the overall density and lot sizes / lot coverage.

Members of the public in attendance at the meeting expressed the following concerns:

- Too little greenspace is incorporated into the development.
- Concerns about the density of the project.
Concerns related to traffic generation and impacts on the surrounding neighborhood / Munhall Ave.

VI. SUGGESTED ACTION

Review the Concept Plan and provide comments to the applicant. Staff recommends the Commission provide feedback on the following:

- ✓ Change in future land use from Industrial/Business Park to proposed single-family residential.
- ✓ Proposed RS-4 zoning.
- ✓ Site layout and access / connection to South Ave.
- ✓ Compatibility of surrounding uses (City storage yard).
- ✓ Request for a reduction in the School District, Park District and Inclusionary Housing Fees.
- ✓ Whether a PUD appropriate for this project. Would a PUD advance one or more of the purposes of the PUD procedure?
 1. *To promote a creative approach to site improvements and building design that results in a distinctive, attractive development that has a strong sense of place, yet becomes an integral part of the community.*
 2. *To create places oriented to the pedestrian that promote physical activity and social interaction, including but not limited to walkable neighborhoods, usable open space and recreational facilities for the enjoyment of all.*
 3. *To encourage a harmonious mix of land uses and a variety of housing types and prices.*
 4. *To preserve native vegetation, topographic and geological features, and environmentally sensitive areas.*
 5. *To promote the economical development and efficient use of land, utilities, street improvements, drainage facilities, structures and other facilities.*
 6. *To encourage redevelopment of sites containing obsolete or inappropriate buildings or uses.*
 7. *To encourage a collaborative process among developers, neighboring property owners and residents, governmental bodies and the community*
- ✓ Would the identified PUD deviations be warranted? To grant PUD deviations, the City Council will need to find that:
 - a. *Conforming to the requirements would inhibit creative design that serves community goals; OR*

- b. Conforming to the requirements would be impractical and the proposed PUD will provide benefits that outweigh those that would have been realized by conforming to the applicable requirements.*

Factors to be considered in this determination shall include, but are not limited to the following:

- 1. The PUD will provide community amenities beyond those required by ordinance, such as recreational facilities, public plazas, gardens, public art, pedestrian and transit facilities.*
- 2. The PUD will preserve open space, natural beauty and critical environmental areas in excess of what is required by ordinance or other regulation.*
- 3. The PUD will provide superior landscaping, buffering or screening.*
- 4. The buildings within the PUD offer high quality architectural design.*
- 5. The PUD provides for energy efficient building and site design.*
- 6. The PUD provides for the use of innovative stormwater management techniques.*
- 7. The PUD provides accessible dwelling units in numbers or with features beyond what is required by the Americans with Disabilities Act (ADA) or other applicable codes.*
- 8. The PUD provides affordable dwelling units in conformance with, or in excess of, City policies and ordinances.*
- 9. The PUD preserves historic buildings, sites or neighborhoods.*

☐ **PROOF OF OWNERSHIP and DISCLOSURE:**

- a) a current title policy report; or
b) a deed and a current title search.

If the owner is not the applicant, an original letter of authorization from the owner permitting the applicant to act on his/her behalf is required. If the owner or applicant is a Trust, a disclosure of all beneficiaries; if the owner or applicant is a Partnership, a disclosure of all partners; if the owner or applicant is a Corporation, a disclosure of all owners with an interest of at least ten percent (10%).

NOTE: Private covenants and deed restrictions can limit private property rights with respect to the use of land even though the City's Zoning Ordinance may authorize the use or a less restrictive use. We strongly advise that

you perform a title search on the property to determine if there any private covenants containing use restrictions or other deed restrictions. As those private covenants and deed restrictions may conflict with the City's Zoning Ordinance, it is further recommended that you consult with an attorney to obtain an opinion with respect to whether your intended use is compatible with those restrictions.

- ❑ **LEGAL DESCRIPTION:** For entire subject property, on 8 ½ x 11 inch paper
- ❑ **PLAT OF SURVEY:**
A current plat of survey for the Subject Realty showing all existing improvements on the property, prepared by a registered Illinois Professional Land Surveyor.

- ❑ **PLANS:**
All required plans shall be drawn on sheets no larger than 24" x 36", unless the Director of Community Development permits a larger size when necessary to show a more comprehensive view of the project. All required plans shall show north arrow and scale, and shall be drawn at the same scale (except that a different scale may be used to show details or specific features). All plans shall include the name of the project, developer or owner of site, person or firm preparing the plan, and the date of plan preparation and all revisions. A pdf document file or files of all plans shall be required with each submittal. The number of paper plans required shall be as determined by the Director of Community Development, based upon the number of copies needed for review.

Copies of Plans:

Initial Submittal - Ten (10) full size copies for non-residential projects OR Twelve (12) full size copies for residential projects; Three (3) 11" by 17"; and a PDF electronic file (On a CD-ROM or may be emailed to the Project Manager). For subsequent submittals, please contact the Project Manager to determine how many copies are required.

Concept Plans shall show:

1. Existing Features:
 - Name of project, north arrow, scale, date
 - Boundaries of property with approximate dimensions and acreage
 - Existing streets on and adjacent to the tract
 - Natural features including topography, high and low points, wooded areas, wetlands, other vegetative cover, streams, and drainage ways.
 - General utility locations or brief explanation providing information on existing sanitary sewer, storm sewer, water, and other utilities necessary to service the development.
2. Proposed Features:
 - Name of project, north arrow, scale, date
 - Boundaries of property with approximate dimensions and acreage
 - Site plan showing proposed buildings, pedestrian and vehicular circulation, proposed overall land use pattern, open space, parking, and other major features.
 - Architectural elevations showing building design, color and materials (if available)
 - General utility locations or brief explanation providing information on existing sanitary sewer, storm sewer, water, and other utilities necessary to service the development

☐ **SUMMARY OF DEVELOPMENT:**

Written information including:

- List of the proposed types and quantities of land use, number and types of residential units, building coverage, floor area for nonresidential uses and height of proposed buildings, in feet and number of stories.
- Statement of the planning objectives to be achieved and public purposes to be served by the development, including the rationale behind the assumptions and choices of the applicant
- List of anticipated exceptions or departures from zoning and subdivision requirements, if any

☐ **PARK AND SCHOOL LAND/CASH WORKSHEETS**

For residential developments, Park and School land/cash worksheets in accordance with Title 16 of the St. Charles Municipal Code with population projections establishing anticipated population and student yields.

☐ **INCLUSIONARY HOUSING SUMMARY:** For residential developments, submit information describing how the development will comply with the requirements of Title 19, "Inclusionary Housing" of the St. Charles Municipal Code.

☐ **LIST OF PROPERTY OWNERS WITHIN 250 FT.**

Fill out the attached form or submit on a separate sheet. The form or the list must be signed and notarized.

AIRHART CONSTRUCTION CORP.

A DEVELOPMENT PROPOSAL FOR PROPERTY LOCATED AT MUNHALL AVE AND S. TYLER ROAD, ST CHARLES, ILLINOIS

PROJECT CONCEPT

The development of this site will include 51 residential single family residences as well as open space and stormwater detention. The location of the property is excellent for residential construction. The property is located off a main collector road with great access from Tyler to the North Ave. shopping corridor and downtown St. Charles. It is excellent for commuting as well with its east side location.

Munhall Glen is designed with smaller lots and extremely livable low maintenance homes for downsizers and those looking for “right sized” homes. Due to the shape of the property we are creating a mix of lot widths and depths. This will allow us to create larger back yards in strategic locations that we believe will add to the character of the development and provides a great solution for the layout of this property.

The home designs are primarily focused on single level living with some homes having first floor master bedrooms with secondary bedrooms or loft space on the second floor. There will be some homes with second floor master bedrooms.

Open space is designed to the north of the project which connects to what will hopefully be a future linear park. This will create great access to the park system in St. Charles and beyond for walkers, runners and bikers. Additional open area will be at the entry which includes open space and a second detention basin. The neighborhood will have sidewalks and two pocket parks for social interaction designed into the neighborhood. The first will be at the entry and the second overlooking the natural basin to the north. These areas allow walkers a place to rest or gather with friends.

In addition, the near town location creates easy access to the many parks and the Fox River path system which gives its residents amazing outdoor opportunities.

Architecture:

The homes include a variety of exterior styles that blend together to create a unique and interesting street scape from traditional to midcentury modern. Homes may feature a front porch to increase neighbor interaction as well as stone or brick accents mixed with siding. The garage faces will be set back from the front of the homes to lessen the impact of the garage doors.

These homes will primarily have first floor master bedrooms designed for owners looking for single level living. The interiors will focus on open concept living with dual use spaces for

efficient living. These homes have smaller private yards and include patios or decks on the rear of the homes for outdoor enjoyment.

The finished living space will range from 1,400 to 3,000 square feet, 2-4 bedrooms and 2-3 ½ baths and include a two car attached garage with 2 additional parking spaces. The exteriors will be a combination of low maintenance materials including architectural grade shingles, fiber cement siding, aluminum soffits and fascia, concrete porches and options to include cultured stone or brick accents.

While the homes are not attached, they draw buyers looking for the low maintenance of attached homes, without the drawback of having attached walls.

Yard sizes and setbacks

Due to the shape of the property 2 lot sizes will be utilized to promote a variety of housing and create better opportunities for expanded rear yards. Following is the approximate minimum lot size in each category.

53 foot wide lots (Premier Homes)

Minimum lot dimensions:	53' x 115'
Minimum lot size:	6,125 square feet
Setbacks:	
Front yard:	
Front Porch:	15'
Living space:	20' (Enclosed, heated living space)
Garage	25'
Side yard:	6' (Minimum 12' between houses)
Rear yard:	30'

74 foot wide lots (Garden Homes)

Minimum lot dimensions:	74' x 95'
Minimum lot size:	7,030 square feet
Setbacks:	
Front yard:	
Front Porch:	15'
Living space:	20' (Enclosed, heated living space)
Garage	25'
Side yard:	6' (Minimum 12' between houses)
Rear yard:	30'

Landscaping:

Landscaping is an important design feature in every project in which Airhart Construction is involved. Having a full-time Landscape Architect on our staff ensures proper design and implementation throughout our projects.

All homes will include a full landscape package. This will include landscaping on all 4 sides of the home, with optional decks or patios on the rear of the homes as well as fully sodded yards.

Two small pocket park will be created. The first will be at the entrance to the neighborhood and the second at the northwest corner along the path that would connect to the future linear park. They will both have small seating areas encouraging neighbor interaction as well as providing a respite for those using the sidewalk loop to walk for exercise.

The storm water basins will include natural plantings and have a prairie or wet-mesic bottom meeting PCBMP's prescribed under the latest Kane County Stormwater requirements. The natural landscaped area will create a unique and interesting transition from the more manicured landscape planned for the homes. In addition, this strategically placed open space can be enjoyed by both the new homeowners as well as those using the future linear park and passing by the entry to the neighborhood.

There will be a Homeowners Association created to maintain the landscaping and detention facilities within the community. This ensures the proper maintenance and long term success of the landscaping.

Design/Engineering:

Public Streets and Sidewalks

There will be a new public street constructed accessing the property from Munhall Ave. from the southeast. A ROW access will be created from South Ave. for future development if desired. Sidewalks will be installed to enhance pedestrian movement throughout the neighborhood.

Storm Water Detention and PCBMP controls:

The existing property has no storm water controls in place. As a part of this development a storm water facilities will provide the required storm water controls and PCBMP's. The storm water will be detained in a natural basin that will be maintained by the homeowners association.

Sewer and Water:

Sewer and water mains will be installed for this new neighborhood.

A DEVELOPMENT PROPOSAL FOR PROPERTY LOCATED AT MUNHALL AVE AND S. TYLER ROAD, ST CHARLES, ILLINOIS

SIMILAR PROJECT EXPERIENCE

The following projects illustrated in this section have been, or currently are being, designed and developed by Airhart Construction. They are examples of development projects similar in scale, housing and scope of the proposed. For each of these projects, the enclosed data sheets include a project description, design aspects, development objectives, site plan and demographics.

College Station

Wheaton

College Station was a redevelopment of decaying properties located on the eastern edge of Wheaton, near the College Avenue train station. Airhart Construction put under contract 3 abandoned homes and a mixed use commercial and residential building and originally rezoned the properties into an 18 unit townhome development. The housing crash of 2007-2011 put the development completely on hold prior to building a townhome.

Revived in 2012, College Station was redesigned and developed into 14 single family cottage style row homes on small lots (30 feet wide by 70 feet deep). The homes border a common drive isle and landscaped

courtyard. The development included underground detention storage, redevelopment of existing public streets along with a comprehensive landscape plan for the new neighborhood. The home designs focused on modern living requirements while aesthetically blending with the existing neighborhood. The homes were sized from 1,350 square feet to 2,000 square feet.

Courthouse Square

Wheaton

Courthouse Square is an adaptive re-use of the Historic DuPage County Courthouse property. This development focused on providing a historic context of the structures and the enviable downtown location to provide a vibrant residential redevelopment of the property.

Airhart
Construction
handled the

design, development and construction of the 43 row homes which were focused on the luxury buyer looking for an in-town location. The row homes were constructed around raised courtyards that provided heavily landscaped open areas and private patios for the owners, unique to a downtown development. In addition, the row homes had roof terraces which provided additional outdoor living space to enjoy views of the courtyards and surrounding neighborhood.

Fisher Farm

Winfield

Fisher Farm is a neighborhood of low maintenance manor homes developed on an open parcel surrounded by developed properties. Airhart Construction put under contract the vacant property, annexed and rezoned it into the Village of Winfield. The development included 71 single family lots, a 3 acre pond, 1.6 acres of natural and wetland development, walking trails and the redevelopment of a portion of the Klein Creek Golf Course that is along the western border of Fisher Farm. The homes are situated on smaller (1/8 of an acre) lots and are designed to maximize the scenic views of the golf course, abundant natural areas and tranquil pond.

As part of the planning/marketing for this neighborhood, the Homeowners Association is responsible for the landscaping and snow removal. While originally targeted towards empty nesters who did not want move into attached homes, the common attribute for the buyer of these homes are people who are on the go.

Mackenzie Place Townhomes

Wheaton

Mackenzie Place is a redevelopment of an existing neighborhood that the City of Wheaton had targeted under their comprehensive zoning plan. Airhart Construction put under contract 13 different properties, annexed, rezoned and developed Mackenzie Place into 36 townhomes and 5 single family home properties. The townhomes targeted buyers interested in first floor bedrooms with high amenity finishes. A private road was installed along with 2 ponds and heavy landscaping to provide an aesthetically pleasing environment.

The single family lots bordering the east side of Mackenzie Place on Stoddard Ave. provided a buffer between the townhomes and existing neighborhood. Airhart Construction contracted for an additional property on Stoddard and developed three more single family homes continuing the redevelopment of this area.

Park Place

Lombard

Park Place is a redevelopment of a failed bank owned condominium development that did not go vertical. Airhart Construction put the property under contract, rezoned it to unattached residential under a PUD, re-engineered and developed the property utilizing infrastructure installed for the failed condominium including underground detention storage.

Park Place was designed and developed into 6 single family cottage style row homes on small lots (30 feet wide by 70 feet deep). Located only a block from the downtown Lombard commercial district and 2 blocks from the train station the neighborhood was designed with walkability in mind. The homes front on existing streets with large front porches maximizing curb appeal with garages behind accessing a common drive isle.

The home designs focus on modern living requirements while aesthetically blending with the existing neighborhood. Extensive landscaping was installed and a pocket park developed for private usage of the residents.

Stafford Place
Warrenville

Stafford Place is a neighborhood consisting of 3 unique housing types creating a diversity of housing and meeting a variety of buyer needs. Airhart Construction worked with the City of Warrenville who had purchased the property with the goal of bringing in a developer under an RFP to redevelop the property and enhance its aesthetics, usage and value as a key entrance into the municipal center of the city.

We designed the property to have a mix of housing which included 13 Cottage Row Homes along the northern border, 11 low maintenance Garden Homes with first floor master bedrooms internal to the site and 3 traditional lots on Ray Street allowing for custom homes along the south border connected to an existing neighborhood. Understanding the transitional nature of this site the design focused higher density along Stafford and lowering density as the development progressed south to Ray Street.

The neighborhood design included a number of features that enhanced the overall aesthetic of this property, connect the residents and utilized the unique topography of the site as it transitioned from north to south. The development met zoning goals of the City of Warrenville acting as a buffer from the density and massing of the Civic Center buildings to the residential properties in the surrounding neighborhoods.

Re: Inclusionary Housing Fee

Dear Ellen,

Thank you for your time and the information you supplied regarding the scope and financial impact of the Inclusionary Housing Fee on our project. As discussed, we have concerns with the amount of the flat fee charged in relation to price point we are trying to meet and its effect on those we are trying to supply housing.

The housing we are proposing are primarily single story and first floor master bedroom detached single family homes. The homes are very much targeted toward an unmet segment in the market, the empty nester to retired. These are people who have been community builders, members of social organizations, churches, etc. They have been in the community and want to stay in the community and at this point they may even be on a fixed income. However, often there is no readily available new housing to meet their needs. In addition, singles are drawn to this type of housing as well.

For us to provide marketable housing to this group, cost is critical. Our pricing goal is to start in the mid \$400,000's. Uniquely, the Inclusionary Housing fee adds almost 1% to the total cost of the housing. This Inclusionary Housing fee pushes the cost of this housing even higher impacting a group of home purchasers of which many will be on a fixed income.

In addition, this fee has no relation to overall sales price. The fee charged is a flat fee, instead of a percentage of sales price. Since we are trying to construct housing in the mid \$450,000 range it has a much greater affect than those building a \$1,000,000 home. This seems to go directly against what we are doing by trying to provide housing to this market.

In addition, there does not seem to be an affordable housing crisis in St. Charles. The latest numbers supplied to me by the staff of St. Charles estimate that 17% of the over 11,000 residential units of housing stock in St. Charles are considered affordable. If the goal for affordable housing is 10% of the housing stock at this point there is a 7%, or over 750 residence, cushion of affordable housing.

AIRHART CONSTRUCTION

"Building a better tomorrow"

Our marketing goal is to have starting prices in the mid \$400,000's. For us to provide marketable housing to this group, every cost that impacts the bottom line is critical. To be charged an Inclusionary Housing Fee of \$3,966.00 per home adds almost 1% to the market price of the home which is a substantial hurdle.

We request the City of St. Charles either remove the Inclusionary Housing Fee from this project or greatly reduce it. We believe this is appropriate because, if charged, it will create a substantial cost burden to the end users and because there is not an affordable housing crisis in St. Charles. We appreciate your thoughtful consideration.

Sincerely,

Court Airhart

Use this worksheet to determine the affordable unit requirement for the proposed development and to propose how the development will meet the Inclusionary Housing requirements of Title 19.

Calculate the number of affordable units required:

Unit Count Range	# of Units Proposed in Development		% of Affordable Units Required		# of Affordable Units Required
1 to 15 Units		X	5%	=	
More than 15 Units	50	X	10%	=	5

How will the Inclusionary Housing requirement be met?

- ☐ Provide on-site affordable units
- ☒ Pay a fee in-lieu of providing affordable units (calculate fee in-lieu below)
- ☐ Provide a mixture of affordable units and fee in-lieu
 - # of affordable units to be provided: _____
 - Amount of fee in-lieu to be paid (calculate below): _____

Re: School Land Cash Donation

Dear Ellen,

Thank you for your time and email communication regarding the scope and financial impact of the School Land Cash Donation on our project. As discussed, we have concerns with the size of the donation charged in relation to the student population increase that our project will actually have on the school district.

The housing we are proposing are primarily single story and first floor master bedroom detached single family homes. The homes are very much targeted toward an unmet segment in the market, the empty nester to retired. These are people who have been community builders, members of social organizations, churches, etc. They have been in the community and want to stay in the community. However, often there is no readily available new housing to meet their needs. In addition, singles are drawn to this type of housing as well.

While these homes are detached single family homes, their impact on the schools is similar to or even less than attached single family homes. Unfortunately there is not a category for this housing within your land/cash donation worksheets.

We have recently built 2 communities very similar to what we are proposing with Munhall Glen. They are the Fisher Farm neighborhood in Winfield and the Garden Home section of Stafford Place in Warrenville. These are homes that typically have 2-3 bedrooms and primarily have only 2 occupants who are not anywhere near school age.

As a part of this submittal I have included:

- 1) Neighborhood design and demographic information on the buyers for Fisher Farm in Winfield.
- 2) Neighborhood design and demographic information on the buyers for the Garden Homes at Stafford Place in Warrenville.
- 3) Land Cash Donation forms filled out for detached single family homes.
- 4) Land Cash Donation forms filled out for attached single family homes.

- 5) Spreadsheet that compares school population totals for Fisher Farm and the Garden Homes at Stafford Place to Munhall Glen.

You can see that these homes produce significantly less children and school population than your detached land cash worksheets predict. In fact, they provide less children and school population than even the attached land cash worksheet predict. Also, your detached housing sheets did not account for 2 bedroom homes.

Our marketing goal is to have starting prices in the mid \$400,000's. For us to provide marketable housing to this group, cost is critical. To be charged detached housing fees for the School District of approximately \$6,343.00 per home adds approximately 1.4% to the market price of the home which is a substantial hurdle. Due to the fact that there is not a category for this type of housing, we request that we be charged Attached Single Family housing fees. This will still generate over \$2,828.00 per home in school donation fees

In addition, this development will supply a substantial boost to the property tax receipts for the School District in perpetuity. With an assumed average sales price of \$475,000 the total fair cash value of all the homes is \$23,750,000 or net taxable value of \$7,916,667.00. Based on the 2019 tax bill and rates, the increase on tax receipts on an annual basis would be approximately \$420,690.00 for the school districts.

We request the City of St. Charles charge attached school donation fees for these homes. We believe this is appropriate and still generates significant dollars for the school district initially and in perpetuity. We appreciate your thoughtful consideration.

Sincerely,

Court Airhart

Fisher Farm

Winfield

Fisher Farm is a neighborhood of low maintenance manor homes developed on an open parcel surrounded by developed properties. Airhart Construction put under contract the vacant property, annexed and rezoned it into the Village of Winfield. The development included 71 single family lots, a 3 acre pond, 1.6 acres of natural and wetland development, walking trails and the redevelopment of a portion of the Klein Creek Golf Course that is along the western border of Fisher Farm. The homes are situated on smaller (1/8 of an acre) lots and are designed to maximize the scenic views of the golf course, abundant natural areas and tranquil pond.

As part of the planning/marketing for this neighborhood, the Homeowners Association is responsible for the landscaping and snow removal. While originally targeted towards empty nesters who did not want move into attached homes, the common attribute for the buyer of these homes are people who are on the go.

Stafford Place

Warrenville

Stafford Place is a neighborhood consisting of 3 unique housing types creating a diversity of housing and meeting a variety of buyer needs. Airhart Construction worked with the City of Warrenville who had purchased the property with the goal of bringing in a developer under an RFP to redevelop the property and enhance its aesthetics, usage and value as a key entrance into the municipal center of the city.

We designed the property to have a mix of housing which included 13 Cottage Row Homes along the northern border, 11 low maintenance Garden Homes with first floor master bedrooms internal to the site and 3 traditional lots on Ray Street allowing for custom homes along the south border connected to an existing neighborhood. Understanding the transitional nature of this site the design focused higher density along Stafford and lowering density as the development progressed south to Ray Street.

The neighborhood design included a number of features that enhanced the overall aesthetic of this property, connect the residents and utilized the unique topography of the site as it transitioned from north to south. The development met zoning goals of the City of Warrenville acting as a buffer from the density and massing of the Civic Center buildings to the residential properties in the surrounding neighborhoods.

Subject: Munhall Glen

Dear Community Development Division,

We live at 840 Munhall Avenue, the property directly south of the proposed residential subdivision of Munhall Glen (running alongside the proposed lot #5). We are concerned about the density of the proposed project and the effect it will have on the traffic flow along Munhall Avenue as well as the aesthetic impact it will have on our street.

Our home was built in 1896 and we have lived in it for fifteen years. We were thrilled to find a historic home with a large lot on a quiet street so close to the downtown area of St. Charles. We are not opposed to the development of the parcel that adjoins ours, but we want to make sure that its development matches the characteristics that attracted us to the area in the first place. We are concerned about maintaining the historic integrity of our home (a large lot with mature trees) that has enjoyed having open space around it for 124 years. We would appreciate any consideration that would create an aesthetic separation between our lot and this development.

Our main concern is the size and number of the lots and the resulting density of the proposed plan.

Thank you so much,

Jeff and Laura Tarro

Subject: comments re: Munhall Glen project / Airhart et al

We own the property to the west, north of South Ave, and have the following comments:

- It would be helpful to traffic flow, to connect South Ave. to Munhall / Tyler, so there is traffic access that goes through.
- We think Industrial would be more appropriate, but if not, it should not change the existing requirements and setbacks for adjacent industrial in the future. There should be appropriate setbacks/buffers on the new project.
- Need to make sure there is appropriate design /buffer, so that there are not future complaints about the existing Industrial business' from New Residential occupants.
- Water flow should go across the Railroad Right of Way to the north, and not on to our property. A new culvert across or other drainage system may be necessary. In the alternative, we may be willing to allow access to improve the existing drain. Easement access to enlarge the detention, across lot lines, would be nice for future potential development / expansion.

Re: Airhart Construction Proposal: Munhall Glen

Dear Sirs:

I represent the owner of the properties located at 1501 E. Main St. and 1519 E. Main St., St Charles, Illinois, to wit: Premium Properties & Development, LLC, f/k/a CM2 Properties, LLC. My client's property is to the northwest of the subject property. My client's property is zoned M-1, Special Manufacturing District.

The current zoning for the vast bulk of the subject property is M-2 Limited Manufacturing, and the St. Charles Comprehensive Plan calls for this part of the subject property, which is closest to my client's property, to be developed as an industrial/business park.

My client opposes the proposed rezoning and development of that portion of the subject property, currently zoned manufacturing, to permit single family homes.

Very truly yours,

McNees & Associates, LLC

Subject: Munhall Glen Concept Plan

I live at 1550 Adams Avenue and I have two questions.

On a Saturday in March after the stay at home order was put in effect, two men came to the property in question and over the course of two days dug a trench across the field and drained the pond located behind 1540 Adams Avenue. Shortly after this another man came and was seen poking around the place where the pond was located. He put up flags around the pond that said, "Wetland Delineation". Is this a wetland and can they develop on it?

Secondly, if the development does come to fruition, will the developers be putting up a privacy fence or better yet a wall to separate the new subdivision from our homes as we feel the new subdivision will greatly diminish our property value?

We feel that 51 houses on this small plot of land are too many.

Thank you,

Nadine and Joseph Trefilek
