Title:

Recommendation to approve a Resolution to Waive the Formal Bid Procedure and Award Service Contract to Layne Christensen Company for Emergency Repair to Well #13

Presenter:

Tim Wilson

Meeting: City Council

Date: June 15, 2020

Proposed Cost: \$ 81,500 – 150,000

Budgeted Amount: \$ 200,000

Not Budgeted:

Executive Summary *(if not budgeted please explain):*

On May 12, Well #13 had a failure in an electrical panel inside of the building. This failure was not a result of the City’s electrical supply to the building, but rather the result of an electrical breaker failure. When this breaker failed, it created an electrical short resulting in damage to the pump motor and cable assembly. The full damage cannot be diagnosed and corrected without removing the pump from the Well.

This Well was scheduled to be pulled and maintained as part of the Well #7 to Well #13 Capital Project budgeted for this fiscal year. Since the Well will need to be removed from service to complete the repairs, the City will conduct full maintenance items at this time.

Unfortunately the timing of this failure has created an emergency need. As discussed in the water study and in past presentations to the City Council, the City’s well supply is currently undersized to meet summer water demands. Depending on the conditions found after pulling the pump, the repairs are expected to take 30–60 days. With the summer heat coming quickly, staff is requesting a Bid Waiver.

Layne Christensen Company from Aurora, IL has provided the City with hourly rates and unit cost estimate. Depending on the damage to the motor and supporting components it is expect the repair and maintenance will cost \$81,000 to \$150,000. The City of St Charles has had a long term relationship with Layne Christen Company; they have provided the City with good service for over 60 years. They have recently completed booster pump maintenance at Well # 8 and Well #11. Both of these projects were competitively quoted and Layne’s numbers were lowest on both projects.

Re: Well #13

Mr. Wilson:

Layne's John Geltz megged Well 13's motor/cable assembly at the well head yesterday and recorded extreme low resistance (.125 megohms). The insulation on the C phase wire, on the power side of the installation's circuit breaker leading to the pump's drive unit, was incinerated. These two observations indicate a probability that the system's electric circuitry experienced a single phase condition resulting in damage to the pump's motor/cable assembly. The damage cannot be diagnosed and corrected without removing the pump from the well.

A well pump's protection is designed to detect a single phase event and shut the motor down with the intent of preventing damage to the motor/cable assembly. Layne advises a thorough inspection and assessment of the motor drive unit by a qualified electrician or drive representative. This type of work is outside the scope of Layne's estimate in this letter.

If contracted, Layne will perform the work on a time and material basis per the attached Work Order Form. The following repair budget estimates are based upon normal pump removal without unusual circumstances such as pump separation.

Well 13's Byron Jackson submersible motor is the most reliable motor available for northern Illinois' deep well application (over 400 in operation). Layne employs the only Technicians that are manufacturer trained and authorized to handle and service these motors. Layne maintains a large inventory of Byron Jackson replacement components.

It is difficult to budget the cost of necessary repairs prior to inspecting the pump components. It is Layne's custom to meet with an Owner representative and our Crew Foreman to conduct a preliminary inspection of the racked components on site. During this inspection, it is decided which components require additional clean up and inspection in Layne's Aurora, IL yard. Layne encourages the City to visit our yard to inspect components with us. At this point, Layne is in position to present a Pump Inspection Report with observations, recommendations, and an accurate repair cost estimate.

WATER RESOURCES

The following is a Pump Repair Budget Estimate consisting of a project scope that includes pull/set pump, clean and inspect all pump components in Layne's yard, field service of the Byron Jackson motor (oil and filter change), televise well, rebuild bowl assembly, and replace all column with epoxy coated Line Pipe. This scope does not include water sample collection or testing.

1. Mobilize, remove pump, rack on site, measure well total depth	\$ 7,000
2. Haul string of Line Pipe (column) from and to well site	\$ 2,000
3. Sandblast Line Pipe for inspection	\$ 1,000
4. Disassemble, clean, inspect bowl assembly	\$ 1,000
5. Hi-Pot test cable	\$ 1,150
6. Service Byron Jackson motor with oil, gasket, filter, balance tube change; epoxy coat exterior	\$ 7,000
7. Rebuild bowl assembly with bushings, wear ring, and impeller shaft, estimate	\$ 8,000
8. Replace 10" surge control valve	\$ 1,536
9. Replace 120' of 10" T&C Line Pipe @ \$63 / ft	\$ 7,560
10. Epoxy coat 120' of 10" Line Pipe @ \$31 / ft	\$ 3,720
11. Televise well	\$ 1,300
12. Miscellaneous consumables (airline, banding), estimate	\$ 1,000
13. Reinstall pump after necessary repairs, chlorinate well, conduct capacity test to waste, demobilize	<u>\$10,500</u>
 Total Pump Repair Budget Estimate per Defined Scope	 \$51,466

Motor Options

A. Byron Jackson 12", 125 HP, 460V, Type M (mechanical seal) factory exchange submersible motor (lead time TBD*)	\$ 73,100
B. Prep/Install/Remove temporary 150 HP loaner motor with four months rental at \$1,500 / month	\$ 22,500

Bowl Assembly Replacement Options

C. Byron Jackson 3 stage 13MQ assembled from Layne inventory (1 week lead)	\$ 22,700
D. Byron Jackson factory built 3 stage 13MQ bowl assembly (lead time TBD*)	\$ 18,910

As Needed Services and Materials

E. Cut and thread 10" Line Pipe	\$ 250 each
F. 10" Line Pipe Coupling, Layne inventory	\$ 276 each
G. 4/0, 600V submersible cable with ground	\$ 28 / ft
H. Byron Jackson flat cable motor link, Layne inventory	\$ 7,250

*Due to the current Covid 19 situation, factory lead times for an exchange motor and new bowl assembly are difficult to determine. At best, I estimate that delivery times for either could be 12 weeks or more. Should a new bowl assembly be required, lead time does not have to be an issue as we are able to build a new one from our stock inventory. A replacement motor could be challenging. I am in the process of investigating alternates such as temporary, used, or alternate motors but am sending this estimate now in the interest of expediting pump removal to determine the situation as soon as possible.

Based upon our current schedule, Layne is in position to mobilize to the site within one to two weeks of the City's written authorization to proceed. Layne will make arrangements to accommodate a more expedient schedule if the City requires.

Thank you for the opportunity to furnish this information. If you have any questions, would like to meet to discuss, or if Layne can be of any service, please do not hesitate to contact me.

Explanations DUPAGE COUNTY

IRON WORKERS AND FENCE ERECTOR (WEST) - West of Route 53.

The following list is considered as those days for which holiday rates of wages for work performed apply: New Years Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving Day, Christmas Day and Veterans Day in some classifications/counties. Generally, any of these holidays which fall on a Sunday is celebrated on the following Monday. This then makes work performed on that Monday payable at the appropriate overtime rate for holiday pay. Common practice in a given local may alter certain days of celebration. If in doubt, please check with IDOL.
