<b>Executive Summary</b> (if not budgeted, please explain):			
<p>To comply with the provisions of the Illinois SAFE-T Act, which mandates municipalities with populations under 50,000 to implement body-worn cameras for all law enforcement by 2025, the police department undertook an extensive study of various body-worn camera platforms over the last year. As we progressed in our research, it became apparent that in-car video systems would also greatly enhance and compliment the recording of police personnel and their interactions.</p> <p>Staff determined Axon was the best fit for police operations as it uses cloud-based retention and redaction software via Evidence.Com and its ease of operation, quality and integration with our existing technologies support this recommendation.</p> <p>The recommended purchase from Axon is through a purchasing agreement with the Sourcewell Cooperative Purchasing Group (Contract #010720-AXN). In addition, staff is recommending to proceed before the end of calendar year 2023 as pricing increases and longer-term contracts provide the City with several benefits to include locked-in inflation escalators, bundled pricing, warranty and software support, and an equipment upgrade in the middle of the contract term.</p> <p>Funding for the project will be off-set by a pending reimbursement grant by the State of Illinois Law Enforcement Standards and Training Board (\$115,000.00) and City funds via our yearly operating budget. We will also be able to utilize fine monies designated for the use of in-car equipment as a means to fund and off-set this expenditure in the outyears of this 10-year contract.</p> <p>A total of twenty (20) in-car video systems will be purchased and installed by Axon Enterprise, Inc. to outfit all of our front-line police vehicles.</p>
