

**AGENDA
CITY OF ST. CHARLES
TREE COMMISSION MEETING
RALPH GRATHOFF, CHAIR**

**THURSDAY, SEPTEMBER 8, 2016 – 7:00 PM
CITY HALL, COUNCIL COMMITTEE ROOM
2 EAST MAIN STREET**

- 1. Call to Order and Pledge of Allegiance**
- 2. Roll Call: Blaine, Brens, Duerr, Grathoff, Hauser, Myers, Otto, Wilfong, Ziegler**
- 3. Introduction of Visitors, Comments and Concerns**
- 4. Minutes: Review and Approval**
 - A. Motion to accept and place on file the minutes of the July 14 , 2016 Tree Commission Meeting
- 5. Old Business**
 - A. Update on Urban Forestry Management Plan
 - B. Update on three Maple trees at Kehoe Dr and Horne St
 - C. Update on Langum Park restoration
 - D. Update on Natural Resources Commission
 - E. Woods of Fox Glen / Outlot B – unauthorized tree removal
- 6. New Business**
 - A. News or Concerns from Public Works
 - i. Fall Planting 2016
 - ii. Tree Trimming Update
 - iii. Other
 - B. News or Concerns from Tree Commission
 - i. Preliminary discussion of future maintenance of Norway Maples
 - ii. Recommendation to ban honeybee-keeping within City limits
- 7. Committee Reports**
 - A. Education Committee
 - B. Langum Park Clean-Up Committee
- 8. Communications**
 - A. Approval of Public Services Division Tree Activity Reports for July and August 2016
- 9. Additional Items from Commissioners, Staff or Citizens**
 - A. Commissioners
 - B. Staff
 - C. Visitors
- 10. Adjournment**

Next meeting will be the annual joint meeting with Batavia, Geneva and St. Charles on October 20, 2016 at Creek Bend Nature Center, 37W700 Dean Street, St Charles, IL.

**MINUTES
CITY OF ST. CHARLES
TREE COMMISSION MEETING
RALPH GRATHOFF, CHAIRMAN
JULY 14, 2016**

Members Present: Chair. Ralph Grathoff, Valerie Blaine, Jon Duerr, Raymond Hauser, Suzi Myers, Caroline Wilfong, Ron Ziegler

Members Absent: Kathy Brens, Ray Hauser, Pam Otto

Others Present: Chris Adesso, Jeremy Craft, Marcelline D'Argento, Isabel Soderlind, Lisa Vielbig

Visitors Present:

1. Call to Order & Pledge of Allegiance

The meeting was convened by Chair. Grathoff at 7:10 p.m.

- 2. Introductions of Visitors:** Chris Adesso introduced Marcelline D'Argento and Lisa Vielbig to the Tree Commissioners. Both Public Works Administrative Assistants will be sharing the duties to support the Tree Commission moving forward.

3. Minutes Review and Approval

Motion to accept and place on file the minutes of the May 12, 2016 Tree Commission meeting. Motion made by Comm. Duerr second by Comm.Blaine to accept and place the minutes on file.

Voice vote: unanimous; Nays – None; Absent: Kathy Brens, Ray Hauser, Pam Otto

- Motion carried at 7:11 p.m.

4. Old Business

A. Update on the Urban Forestry Management Plan

Comm. Blaine stated she had made some progress proof-reading the Urban Forestry Management Plan but she still had more editing to do. Her intention is to: (1) reduce the wordiness of the document, and (2) clarify the information for the intended reader. As mentioned before, the document is a combination of urban forestry policies and a procedural manual for the Public Works Urban Forestry team. Once the document is approved by Council, it will be published and posted on the City's website making it available for the general public.

Comm. Duerr recommended reviewing the edited document at the September 8 Tree Commission meeting. After the document is finalized, AJ Reineking will present it to the Government Services Committee, followed by formal approval from Council.

B. Reorganization of the Tree Commission into a Natural Resources Commission

Chair. Grathoff recapped that the Commission had voted and approved the motion to become a Natural Resources Commission last month. In an effort to move this initiative forward, he had written two mission statements for the Commissioners to consider and approve. Once this was voted on and approved, Chris Adesso would present this initiative to the Public Works Director, City Administrator and Council for formal approval.

The mission statements were distributed and reviewed by the Commissioners. (See attached.)

Upon review, the consensus agreed on the following mission statement for the Natural Resources Commission:

“Our mission is to work through a committed partnership with the community to conserve, preserve, protect and enhance the City’s natural resources and to raise awareness and make recommendations concerning environmental issues within the City of St. Charles.”

The recommendation was made to approve the above mission statement and present the concept of reorganizing the Tree Commission to a Natural Resources Commission, given the similar advisory committee model as the current Tree Commission, at the August 22 Government Services Committee meeting,

Chris Adesso recommended a Roll Call:

Comm. Blaine: Yes
Comm. Duerr: Yes
Chair. Grathoff: Yes
Comm. Myers: Yes
Comm. Wilfong: Yes
Comm. Ziegler: Yes

Motion made by Comm. Blaine second by Comm. Myers. Approved by voice vote. Motion carried.

Chris Adesso mentioned the next step of the process was to request the approval of reorganizing the Tree Commission to a Natural Resources Commission and present the proposed mission statement to the August 22, Government Services Committee. Once final approval is received from Council, the next step would be to amend the Tree Commission portion of the codebook.

Chris Adesso will be presenting the Natural Resources Commission mission statement at the Government Services Committee meeting, Monday, August 22 in the Council Chambers at 7:00 p.m.

5. New Business

A. News and Concerns from Public Works:

- i. **Tree Trimming:** Jeremy Craft reported tree trimming has been limited to service requests in the last month or so. The primary focus of the division has been other Public Services construction/maintenance duties and to prepare for the City’s America in Bloom judging.

Comm. Duerr asked about the Sycamore trees removed behind Smitty’s and the Harris Bank. Mr. Craft indicated that these trees were private trees and the City did not have any jurisdiction over them.

- ii. **Fall Planting:** Mr. Craft mentioned there are only 65 trees currently on the fall tree planting list. Mr. Craft also added that the division will be sending out a bid for tree planting again this year. This will be a one year contract with an additional two year extension. Jeremy also reminded the commissioners that the Public Services tree replacement budget is now back to “normal”. It is no longer near the amount the division had during the years the ash trees were being removed and replaced.
- iii. **Replacement of Arbor Day Tree at Fox Ridge School:** The Arborist Team was also notified that the tree planted on Arbor Day at Fox Ridge School did not survive but it will be replaced with another Zelkova during the fall planting season.

- iv. **Request from Resident to Remove Parkway Tree:** Public Works received a call from Tim Hovious residing at 1036 Kehoe Drive. He is requesting Public Services remove one of the 3 maple parkway trees running along the Horne Street side of his home, preferably S2 or S3.

Per Chris Adesso, the Norway Maples are apparently 13 years of age. The resident is requesting the removal of one of the trees so the parkway can receive more sun and the parkway grass could grow.

The Commission viewed the three trees online in the 2016 version of Google Maps. Looking at the trees from the "street view", the trees seemed in poor condition. It is a very shaded street with these growing maples being planted too closely together. The parkway appeared to be mostly dirt/soil, with the salt, roots and water draining towards the tree and not to the grass. The resident has tried to reseed grass twice and has not been able to grow any considerable grass in this area.

Jeremy Craft mentioned the arborist staff has thinned out the trees several times and that has not helped. He added that the S1 tree was in worst shape and it may need to be removed in the future.

While the trees did not appear to be in very good condition, the recommendation was made to table the removal of the tree until all the Commissioners conducted their own site review of the S2 tree (2nd tree from the corner of Horne & Kehoe) before the next scheduled meeting, September 8. A motion and vote to remove the tree will be taken at the September meeting.

6. Committee Reports

A. Education Committee:

Comm. Wilfong indicated she still had several copies of the book entitled *Why Would Anyone Cut a Tree Down?* to deliver in honor of 2016 Arbor Day. She mentioned that she would distribute the books to the remaining schools once they were back in session.

B. Publicity Committee: None

C. Langum Park Clean Up:

The meeting tonight began at Langum Park. The Commissioners walked around Langum Woods determining next steps for the Langum Woods Clean Up Project.

The commissioners agreed more clean up was needed and the pathways needed additional chips. Jeremy Craft and the arborist team will inspect the area late this coming fall/winter and determine if the area needs more woody evasive removal. If monies are available in this year's budget, the crews will work on removing the woody evasives. If not, provisions will be made in next year's budget.

D. October Joint Meeting

Isabel Soderlind reminded the Commissioners of the upcoming Tri-Cities Joint Tree Commission meeting in October. It is the City's turn to host the meeting this year. Isabel requested some available dates she could offer to the Batavia Environmental Commission and Geneva's Natural Resources Committee. The Commissioners agreed on two options, October: Tuesday, October 18 or Thursday, October 20.

Comm. Blaine recommended meeting at Creek Bend Nature Center at LeRoy Oakes Forest Preserve for this year's meeting. Isabel Soderlind will contact Batavia Environmental Commission and

Geneva's Natural Resources Committee to see if either one of these dates was preferable for their group.

7. Communications

Electric Division Tree Activity Reports

Motion to accept and place on file the Public Works Tree Activity Reports for May & June of 2016. Motion made by Comm. Duerr second by Chair. Grathoff to accept and place on file the reports as presented.

Voice vote: unanimous; Nays – None; Absent: Kathy Brens, Ray Hauser, Pam Otto
- Motion carried at 8:20 p.m.

8. Additional Items – Comments

A. Commissioners: None

B. City Staff:

Isabel Soderlind: Thanked the commission for all their support. It has been her pleasure to assist the committee the past couple of years.

Chris Adesso: will update AJ Reineking of today's decision to delay the tree removal at 1036 Kehoe Drive. AJ in turn will contact and update the resident.

9. Adjournment

Motion by Comm. Blaine to adjourn the meeting, second by Comm. Ziegler.

Voice vote: unanimous; Nays – None; Absent: Kathy Brens, Ray Hauser, Pam Otto

- Motion carried at 8:24 p.m.

/ims

Mission statement for City of St. Charles Natural Resources Committee

Version one

Our mission is to raise awareness of natural resources and environmental issues within the City of St. Charles. Our intent and purpose is to inform the preservation, protection, enhancement and conservation of our natural resources through a committed partnership with all the community.

Version two

Our mission is to work through a committed partnership with the community to conserve, preserve, protect and enhance the city's natural resources and to raise awareness and make recommendations concerning environmental issues within the City of St. Charles.

St. Charles, IL 60174

RE: Out Lot B

Dear Mr. Grathoff, Chairman and Members of the Tree Commission,

My relationship with Out Lot B started in the early 1970's, after I purchased the adjoining five acres located to the south. At that time, what is presently Out Lot B was part of the gravel pit property consisting of 140 acres more or less.

Members of the Wayne equestrian community and myself maintained and expanded existing trails through the entire property and the adjoining properties.

Once the gravel pit became the Woods of Fox Glen, our trail activity continued on Out Lot B and adjoining properties to the south and east.

Starting in the late 1990's, my efforts, along with others, commenced to become a "restoration" of the property. The work started at the east end and proceeded to the west. Approximately 10 acres have been worked on for restoration, but not completed. Restoration is always a "work in progress". When work commenced, the condition of the property can be reasonably described as "unprotected and degraded". The property was thick with multiflora rose, buckthorn, bush honeysuckle, box elder trees, maples, ash, elms and other "shade tolerant" trees. Hardwoods such as oaks, walnuts and hickory were old, rare and very stressed. Much of the soil was bare and unprotected as a result of the thick "canopy" that shaded the area and prevented a healthy "understory". The property, other than the maintained trails, was impenetrable. Presently, the condition of approximately 10 acres of the western portion of Out Lot B is in that "degraded" condition.

For purposes of brevity, I have exhibits that support my message. Exhibits 1 and 2, aerials from 1939 show that the property historically was a prairie, being farmed, with a few large hardwoods along the Norton Creek. Presently, there is little, if anything special about the trees in Out Lot B. It is all regrowth since the 1950's and 1960's, when farming stopped. The north south road on Exhibit 1 is Nelson Drive. The junction of the north branch and south branch of Norton Creek is approximately 125 yards from the east border of Out Lot B. Exhibit 3 confirms that the area was originally "open".

Exhibit 4 "Too Many Trees in the Forest", Chicago Tribune, April 15, 2015, provides an "eye opener" as to what is being done to recreate prairies and savannas. If one values the trees removed in the Lake County project, it would be in the "millions" using the analysis as provided in Graf Tree Care report of February 22, 2016. The value of the removal in DuPage and Kane County would be considerably less. These Forest Preserve Districts are just getting started on the Restoration trend. This article makes it very clear that a new "mind set" about trees, prairies and forest restoration is evolving with Forest Preserves, Park Districts and private landowners.

Exhibit 5 is one of my invoices for prairie grasses and for forbs, much of which has been planted in the portion of Out Lot B which I have worked. The results of the plantings are becoming more evident.

I suggest that you consider a visit to the Kane County Forest Preserve Enhancement Project, which is located at the southwest corner of Route 31 and Fabyan Parkway. The restored woods in that project mimic to a large extent the work that I have done in Out Lot B.

Consider reviewing or reading "Miracle Under the Oaks" by William K. Stevens, 1977. This book is a factual account of what Steve Packard, started in 1997, with lots of volunteers, restoring Cook County Forest Preserve property along the North Branch of the Chicago River. Steve Packard is credited with starting the restoration movement that culminated in the work being done as expressed in the Chicago Tribune article of April 15, 2015, which is enclosed as Exhibit 4.

In summary, I invite all of you to tour the property with me. I can accommodate you on more than one date.

I have just attended the North American Prairie Conference, at Illinois State University in Normal, Illinois on July 17, 2016 – July 20, 2016. These conferences began in 1970 and are held every two years in various locations in the Midwest and Canada. Briefly, my take-away from the conference:

- There is no "one way" for prairie, savannah restoration. It is an art, not a science. Everyone in this field is constantly learning.

- Restoration is "inspired guesswork".

Where should St. Charles go from here? I have delivered the "wake-up call", although it may have been delivered abruptly or even rudely.

Out Lot B is a potential restoration "jewel", and it should be restored. Approximately, 1/3 of the work has been completed.

If not St. Charles, with volunteers, then, who? St. Charles can little afford to pay hundreds of thousands of dollars to hire a restoration contractor, and then continually pay to maintain the restoration.

If not now, when should the work be done? The degradation continues, slowly.

Looking forward to meeting all of you on site, and I can also appear at your meetings.

Respectfully,

Douglas C. Hancock

STACEY WESCOTT/CHICAGO TRIBUNE

Janet Zupko, of Chicago, walks Sunday at Ryerson Woods Forest Preserve in Riverwoods. "My opinion is that you don't cut down perfectly healthy trees unless it is really necessary," she said. Some counties are felling trees in preserves as part of restoration projects.

Too many trees in the forest?

Some preserve districts cut from crowded woods, aiming to restore prairies, draw back native species

BY ROBERT MCCOPPIN
AND SHERYL DEVORE

Chicago Tribune

The buzz of chain saws filled Potawatomi Woods this winter. Century-old trees cracked and fell to the ground. Contractors cleared 259 acres of mature ash, maples and sycamores.

With the spring thaw, parts of the forest preserve near northwest suburban Wheel-

ing look like a muddy wasteland. Hundreds of tree trunks lie stacked like firewood. Stumps dot the landscape.

If the areas look devastated or ugly, Cook County Forest Preserve District officials say their work will eventually lead to a beautiful, and ecologically important, rebirth. The goal is to bring back the native habitat of grasses and sedges, red-headed woodpeckers and wildflowers.

The project is part of a growing effort by

conservationists in the Chicago area to cut down overcrowded woods into more open woodlands, savannas and meadows. In some cases, forest preserves are being transformed into prairie preserves. It's also an indication that, despite their names, forest preserve districts in the Chicago area are spending a good deal of their resources tearing down trees.

"Now, ironically, forest preserves have too many trees," said Benjamin Cox, executive director of the Chicago-based Friends of the Forest Preserves. "(Having)

Turn to *Preserves*, Page 6

Lake County district focuses on oak trees

BY SHERYL DEVORE
Chicago Tribune

The Lake County Forest Preserve District has torn down thousands of maples, elms and other mostly healthy trees in the past three years, and those who support the project say they're taking a long view toward the forests' health.

The nearly 4,000 trees were felled because they were crowding out oaks and the wildlife that rely on oaks for food and shelter.

"The big issue here is regeneration," said Robert Fahey, a forest ecologist at The Morton Arboretum who consults with Lake

County. "The (older) oaks are all going to die within the next 100 years. ... There are no young oaks to replace them."

Lake County believes its work can serve as a model for other conservation agencies in the Chicago area, which has experienced a major loss of once-dominant native oaks. But Lake County officials acknowledge it's tough watching mature trees fall.

"Nobody likes to cut down trees," said Deb Maurer, natural resources manager. "It wasn't easy for our staff" to watch the trees be taken down, she said. Maurer heads a team

removing trees, planting oak seedlings and gathering wildlife and soil composition data. The \$3 million project was funded from a voter-approved 2008 bond referendum for restoration work.

This winter, a contractor removed invasive woody species and shade-tolerant understory trees from sections of northern flatwoods communities in the preserves.

To grow successfully, oak saplings need light, and over the past century, the canopies of many of the area's natural woodlands have become closed, taken over by trees such as maples that are more tolerant of shade. The idea behind the clearing projects is that they will increase the amount of sunlight that reaches the ground, encouraging the re-

generation of native, shade-intolerant trees and shrubs like white oak, red oak, walnuts, viburnum and hazelnut.

In some wooded areas, for example within Ryerson Conservation Area near Deerfield, sugar maples have outgrown the oaks and are stifling sunlight from getting to oak saplings.

Over the past several decades, the forest preserve has introduced prescribed burns to the woodlands, removed nonnative species and developed a deer-reduction program to keep the oak saplings from being over-browsed.

"But that just hasn't been enough," Maurer said.

Working with Fahey, the forest preserve created plots of land within the woods of the four preserves with varying amounts of

tree removal and planting. At some sites, like Ryerson, visitors can see large stumps where sugar maples once stood.

Maurer said not all maples are being removed.

The team is gathering data to see which regimen will most help oak seedlings grow successfully. In addition, they are monitoring soil properties and changes in other plant and animal life in the oak woodlands.

The hope is that the work will bring back native animals, including certain species of birds and amphibians that have been declining, said Gary Glowacki, Lake County Forest Preserve District wildlife biologist.

In the past 20 or 30 years, the preserves "completely lost wood frogs and spotted salamanders," species that

require open oak woodlands with transient ponds in which to breed, he said.

Bird species such as red-headed woodpeckers also require open woodlands and have been documented less and less over the past 20 years in the preserves the district is managing for oak regeneration, Glowacki said.

After two years of tree removal, the woodpeckers are returning to all the preserves where the work is being done, he said.

"We're trying to make the ecosystem healthier and trying to create a new generation of oak trees that will be there for the future," Fahey said. "We have to think about the future of our forests."

DeVore is a freelance reporter.

Trees felled for restoration

Preserves, from Page 1

too many trees creates tons of shade, and prevents growth of the understory."

In Lake County, about 4,000 trees, many mature and healthy, have been felled from four preserves in the past three years in an effort to let in sunlight to grow more oak trees. Though pests have also been a major reason for tree removal, the large-scale removal of trees to restore and preserve habitat marks a continuing evolution in conservation.

When Illinois lawmakers authorized the creation of forest preserve districts in 1913, the mission was exclusively to save forests. Land management meant planting more trees, preventing fires and otherwise largely leaving the preserves alone.

But fire suppression and preservation led to fast-growing trees like sugar maples and elms shading out other plants, primarily oak trees that had dominated the area's woodlands for thousands of years, said Robert Fahey, forest ecologist at The Morton Arboretum in Lisle.

Before Europeans settled the area, fires set by Native Americans and by lightning strikes "created a mosaic of prairies, savannas and woodlands," Fahey said, keeping the growth of other plants in check while allowing the fire-resistant oaks to thrive. But when the fires stopped, the ecosystem eventually got knocked off balance, with thickets of nonnative species like buckthorn and honeysuckle spreading unchecked, naturalists say.

In recent decades, the removal of such invasive trees, often with the help of volunteers and controlled brush burns, have been common in forest preserves, though not without controversy. Protests led Cook and DuPage counties to ban such tactics in 1996. The bans were lifted in stages over 10 years, and some of those who raised red flags then have since been won over.

After his initial concerns were answered, Cook County Commissioner Peter Silvestri, for instance, now says he supports restoration.

Chip O'Leary, chief ecologist for the Cook County preserves, said restoration projects have prompted the renewal of plants and wildlife and have attracted greater diversity that's the hallmark of a healthy ecosystem. With the return of certain types of frogs and snakes, migratory and wetland birds and small mammals in Potawatomi Woods, he said, "it'll be a lot prettier place to be."

Still, not everyone agrees with the approach.

Mark Spreyer is executive director of the Stillman Nature Center, a private, nonprofit center on a former farm in South Barrington that features woods and prairie. Spreyer led Chicago's peregrine falcon release program in the 1980s and has taught environmental biology at the College of Lake County.

He says it's unrealistic to try to re-create an idealized setting from 200 years ago when the environment has changed. He notes, for instance, that the federal map of what plants can live in

STACEY WESCOTT/CHICAGO TRIBUNE

Andy Wade uses a log grabber to stack tree trunks onto a flatbed truck in January after the clear-cutting of land in a Cook County forest preserve in Wheeling. Some trees in the county are being removed as part of a restoration effort.

Lumberjack Doug Brehm cuts up trees in January in a Cook County forest preserve in Wheeling.

different zones has been redrawn in recent years.

Some plants and animals thrive in the current condi-

tions and will be harmed by attempts to destroy habitat and convert cool, tranquil forests to "hot, buggy"

meadows, he said. His approach reflects the recent but controversial notion that "novel ecosystems" with nonnative species have adapted to human intervention.

"The public prefers forests," he said, "but we're getting prairie shoved down our throats."

Yet restoration, including the clearing of existing trees, is solidly in the mainstream of land management. The U.S. Forest Service has its own program that includes thinning and burning woods in places like Mark Twain National Forest in Missouri and Arkansas. In Cook County, restoration projects are often carried out in consultation with state and federal authorities.

Naturalists argue that precisely because humans have carved up and altered natural areas so drastically, they require aggressive management to restore balance and diversity.

"People had understandable concerns when they saw so many trees coming down," Cook County Forest

District spokesman Don Parker said, "but once we've talked to them about what we're doing, people have been supportive of the work."

The Potawatomi Woods project is funded through \$1.7 million provided by the Illinois Tollway as compensation for the trees that had to be removed several years ago to widen the nearby Tri-State Tollway. By agreement, the money had to be spent in the area, near the Des Plaines River, though officials said restoration would have been done eventually, anyway.

For the first time, the forest agency plans to sell some of the wood as timber and firewood, hoping to earn \$235,000. More typically, such wood would be burned or chipped on-site.

Similar tactics have been used with great success in other preserves, officials said. Prime examples are Deer Grove East near Palatine and Orland Grassland preserves, where the U.S. Army Corps of Engineers recently completed a \$12 million restoration of

almost 1,000 acres. Both sites have attracted native grassland wildflowers, butterflies and breeding birds, including bobolinks, Henslow's sparrows and eastern meadowlarks.

The work in Cook County fits in with the Next Century Conservation Plan, which aims to restore 30,000 acres over 25 years. The work will cost an estimated \$40 million a year, though where most of the money will come from has not been identified.

Officials from other counties in the area are approaching restoration in their own ways.

In Lake County, the forest preserve district is thinning forests as part of a regional plan to grow new oak woodlands. The loss of oak woodlands that once dominated the area, and lack of young oak trees, is of particular concern to conservationists.

Other forest preserve districts in the area are pursuing ambitious restoration projects that do not involve wide-scale tree removal.

In DuPage County, work began this winter to remove a stand of invasive trees from Klein Fen, but the district is not generally removing large trees, said Scott Meister, assistant manager of natural resources. The district is doing other innovative restoration, Meister said, widening waterways like Spring Brook Creek No. 1 near Winfield, to better handle floods.

In Will County, the forest preserve district's largest restoration project at Hadley Valley in Joliet comes around a cost of \$10 million. That project involves planting more than 300,000 wetland plants and almost 34,000 trees and shrubs to convert farmland back to wetland and prairie.

Kane County has limited itself to clearing smaller invasive species. It is growing oak seedlings and planting them in former farm fields to re-create savannas.

Drew Ullberg, director of natural resources for the Forest Preserve District of Kane County, said he's awaiting the results of Lake County's woodland thinning.

"We're watching to see the ecological results and the public reaction," Ullberg said. "Not everybody's an ecologist. When you have the name 'forest preserve district,' people are really sensitive. Why are you cutting trees? We hear that."

The McHenry County Conservation District got that reaction this spring after it cleared brush as part of a restoration program on Nippersink Creek. Ed Collins, director of land preservation and natural resources, wrote online that visitors tend to judge such a project prematurely by its cut stumps and empty space.

Over time, he wrote, sunlight and plantings will bring new generations of butterflies, oaks and wildflowers, and transform the landscape "to a soft water color portrait of a sublime and very Midwestern landscape."
