### **EXECUTIVE SUMMARY:**

The Commission provided preliminary review comments on this project on 2/6/13.

On the Old City Hall and the City Hall Annex building east elevation, the project includes window and door replacement, limestone to replace deteriorated brick along the lower portion of the wall, re-use of salvaged brick along the wall (including filling the planter recess) and tuckpointing. The cupola is proposed to be recovered with new louvered side panels as shown in the rendering. The flat roof portions of the building will be re-roofed. On the south wall facing Main St., the clay tile coping will be replaced. Additionally, EIFS will be installed on a small second-floor shed structure that projects out behind Old City Hall. (This section of the building is not readily visible).

On the Municipal Center building, the entire brick portion of the east elevation facing Riverside Ave. is proposed to be replaced with new brick to match the existing brick. This portion of the building will be reroofed, with the stone caps reset. On the granite portions of the Municipal Center building, cracked or damaged sections of granite will be repaired or re-set. The front section of the building will also be reroofed. Metal coping is proposed on the uppermost roof section as shown on the plans.

### **RECOMMENDATION / SUGGESTED ACTION:**

## PROJECT OBJECTIVES

THE PUBLIC WORKS DEPARTMENT HAS IDENTIFIED CERTAIN BUILDING SYSTEMS AS HAVING COMPROMISED WATERTIGHTNESS AND DURABILITY AMONG THE FOUR DIFFERENT INTERCONNECTED BUILDINGS THAT ARE IDENTIFIED AS THE OLD CITY HALL THE SOUTH ANNEX, THE ATRIUM, AND THE MUNICIPAL CENTER. WITH A FEW EXCEPTIONS, MANY DIFFERENT ROOFS HAVE MET THEIR USEFUL LIFE AND REQUIRE REPLACEMENT & REDESIGN. LIMITED REINSTALLATION OF MECHANICAL EQUIPMENT AND ELECTRICAL LIGHTING & POWER IS REQUIRED. ALL THE BRICK WALLS REQUIRE EXTENSIVE MAINTENANCE AND REBUILDING. REMOVAL AND REINSTALLATION OF NEW WINDOWS IS REQUIRED FOR THE OLD CITY HALL AND SOUTH ANNEX. AT SEVERAL LOCATIONS, THE WHITE GRANITE CLADDING REQUIRES INVESTIGATION AND REPAIR.
