II. PROJECT OVERVIEW:

A. BACKGROUND

In 2006, the City Council approved the Pine Ridge PUD Ordinance 2006-Z-4 “An Ordinance Rezoning Property and Granting a Special Use as a Planned Unit Development for Pine-Ridge Park and Regency Estates PUD (A Portion of the West Gateway PUD)”. The details of the Pine Ridge PUD approval are as follows:

- Permits a variety of commercial uses.
- A Concept Plan and Final Plat of Subdivision for the Pine Ridge commercial portion of the development were approved.
 - Each commercial lot is required to have a PUD Preliminary Plan reviewed by the Plan Commission and approved by City Council as the lots are developed.
 - Final Plat of Subdivision – In 2006, the City Council also approved Resolution 26-2005 “A Resolution Approving the Final Plat of Subdivision Pine Ridge Business Park Phase I (West Gateway PUD)”. This Plat of Subdivision formally created the existing lots for future commercial uses and stormwater retention areas.
- Road, utility, and stormwater infrastructure layout.
- Specific standards for:
 - Architectural design.
 - Bulk requirements.
 - Signage.
 - Landscaping.

B. PROPOSED DEVELOPMENT

The Learning Experience (represented by Anthony DeAngelis of IMDC-CS, LLC.) has submitted applications for a PUD Preliminary Plan and Final Plat of Subdivision in relation to the construction of a new The Learning Experience daycare facility on Lot 8 of the Pine Ridge PUD. The details of the proposal are as follows:

1. PUD Preliminary Plan

- One 10,000 square foot daycare building.
 - Outdoor play area to the west of the proposed building.
- A new access-point off of the internal circulation drive with a shared access road for Lots 8 & 9.
 - The circulation for the daycare site will be one-way.
- 41 parking spaces.

2. Final Plat of Subdivision

The applicant is proposing to subdivide Lots 8 & 9 to increase the size of Lot 8 so the daycare is completely constructed on Lot 8. The resized lots are proposed as follows:

- Lot 8 – 52,872 square feet.
- Lot 9 – 43,575 square feet.

III. ANALYSIS OF PLANS

Staff performed an analysis of the submitted preliminary plans to identify any deficiencies with the proposed plans and the standards established in the Pine Ridge PUD and/or Title 17 (Zoning Ordinance). The following is a detailed description of staff's analysis:

A. PERMITTED USES

Exhibit IV-A of the Pine Ridge PUD lists all the uses that are permitted or considered special uses within this PUD. **Nursery Schools and Daycare Centers** is listed as a permitted use.

B. BULK AND SETBACK STANDARDS

The majority of the required bulk standards are contained in the Pine Ridge PUD. Staff has reviewed the submitted site plans to ensure conformance with the applicable bulk and setback regulations per the Pine Ridge PUD. In instances where there are no provisions for certain standards in the PUD, staff has reviewed the site plans against the regulations of the underlying BC- Community Business Zoning District as stated in **Table 17.14-2 Business and Mixed Use Districts Bulk Regulations**. The following table summarizes this review:

| Category | Pine Ridge PUD / Zoning Ordinance Standard | Proposed |
|------------------------------|---|---|
| Lot Area | 1 – Acre (Underlying Zoning District) | 1.21 acres |
| Lot Width | None | 202' |
| Rt. 64 Setback | 50' | 50' |
| Building Setbacks: | | |
| <i>Front: South (Rt. 64)</i> | 50' | 115' |
| <i>Interior Side: East</i> | 0' | 29' |
| <i>Interior Side: West</i> | 0' | 90' |
| <i>Rear: North</i> | 0' | 23.3' |
| Parking Setbacks: | | |
| <i>Front: South (Rt.64)</i> | 50' | 50' |
| <i>Interior Side : East</i> | 0' | 0' |
| <i>Interior Side: West</i> | 0' | 5' |
| <i>Rear: North</i> | 0' | 28' |
| F.A.R | 0.40 | 0.19 |
| Building Height | 40' | 27' |
| Parking Stall Size | 9' wide by 18' | 9' x 18' |
| Drive-Aisle Width | 14' (One Way), 24' (Two Way) | 16.5 Feet (One Way Portion), 24' (Two Way Portion) |
| Parking Requirement | 3.5 Spaces per 1,000 SQ FT of GFA - (35 Required) | 41 |

The applicant is proposing a cross-access easement over the proposed eastern access-drive/parking aisle to accommodate any future uses on Lot 9. Staff has asked the applicant to stub-out the southern portion of this drive to establish an ingress-egress point for Lot 9.

C. PLAT OF SUBDIVISION

The applicant is proposing to utilize all of Lot 8 and a portion of Lot 9 for the daycare facility. The applicant is proposing to resubdivide Lots 8 & 9 so that the daycare is completely located on Lot 8. The subdivision results in slightly larger Lot 8 and smaller Lot 9. The minimum required lot size in the underlying BC Zoning District is 1-acre.

- Lot 8 is proposed at 52,872 square feet (1.21 acres)
- Lot 9 is proposed at 43,575 square feet (1.00 acre).

D. LANDSCAPE PLAN

Exhibit IV-A of the Pine Ridge PUD established the landscape standards for this development. Staff has reviewed the submitted landscape plan and determined that the plan does meet the standards in the PUD.

E. BUILDING ARCHITECTURE

Exhibit IV-A contains architectural design guidelines for all lots within the Pine Ridge PUD. Staff has reviewed the submitted building elevations for conformance with these standards and determined that they are consistent with the requirements of the Pine Ridge PUD.

F. SIGNAGE

The relevant sign regulations for this site are incorporated into Exhibit IV-A of the Pine Ridge PUD. Staff reviewed the proposed signage detailed on the architectural elevations for conformance with these standards. The following table details that review:

| Category | Pine Ridge PUD /Zoning Ordinance Standard | Proposed |
|--------------------------------------|---|----------------|
| Wall Signage Area | | |
| <i>South Elevation (Rt.64)</i> | 1.5 times the lineal frontage of the building (180 square feet permitted) | 36 square feet |
| <i>North Elevation</i> | 1.5 times the lineal frontage of the building (124.5 square feet permitted) | 0 square feet |
| <i>West Elevation</i> | 1.5 times the lineal frontage of the building (124.5 square feet permitted) | 0 square feet |
| <i>East Elevation (Randall Road)</i> | 1.5 times the lineal frontage of the building (180 square feet permitted) | 0 square feet |
| Free Standing Sign Area | 32 square feet per sign face | 29 square feet |
| Monument Sign Height | 10' | 8' |
| Monument Sign Setback | 10' from property line | 15' |

N/A ☐ **PUBLIC BENEFITS, DEPARTURES FROM CODE:**

A description of how the PUD meets the purposes and requirements set out in Section 17.04.400 of the Zoning Ordinance. Any requests for departures from the requirements of Title 16, "Subdivisions and Land Improvement," and Title 17, "Zoning," shall be listed and reasons for requesting each departure shall be given.

☐ **SCHEDULE:** Construction schedule indicating:

- a. Phases in which the project will be built with emphasis on area, density, use and public facilities, such as open space, to be developed with each phase. Overall design of each phase shall be shown on the plat and through supporting material.
- b. Approximate dates for beginning and completion of each phase.
- c. If different land use types are to be included within the PUD, the schedule must include the mix of uses to be built in each phase.

N/A ☐ **INCLUSIONARY HOUSING SUMMARY:** For residential developments, submit information describing how the development will comply with the requirements of Chapter 17.18, Inclusionary Housing, including:

- The number and rental/for sale status of Market-Rate Units and Affordable Units to be constructed including type of dwelling, number of bedrooms per unit, proposed pricing, and construction schedule, including anticipated timing of issuance of building permits and occupancy certificates.
- Documentation and plans regarding locations of Affordable Units and Market-Rate Units, and their exterior appearance, materials, and finishes.
- A description of the marketing plan that the Applicant proposes to utilize and implement to promote the sale or rental of the Affordable Units within the development; and,
- Any proposal to pay fees in lieu of providing the required Affordable Unit, per section 17.18.050.

☒ **SUBDIVISION PRELIMINARY PLAN CHECKLIST:**

If the PUD Preliminary Plan involves the subdivision of land, a completed Subdivision Preliminary Plan Checklist must be submitted. This Subdivision Checklist may reference the same set(s) of plans as the preceding checklists for Site/Engineering, Sketch Plan, Tree Preservation, and Landscape Plans, but the additional information required by the Subdivision Preliminary Plan Checklist must be included, where applicable.

N/A ☐ **APPLICATION FOR SPECIAL USE FOR A PUD:**

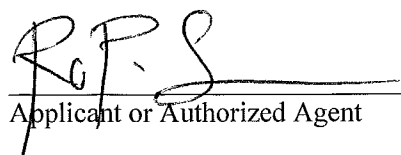

The application for PUD Preliminary Plan must be accompanied by an application for a Special Use for a PUD, unless the Special Use was previously granted and no amendment is needed. Documentation required for both applications need not be duplicated.

- (b) Special Uses
 - ☐ Outdoor dining
 - ☐ Outdoor entertainment
 - ☐ Outdoor sales areas

- 2. Floor Area Ratio (EAR): The Maximum Building Coverage shall be 0.40.
- 3. Building Height: The maximum building height shall be 3 stories or 40 feet, not including screening devices for roof top mechanical equipment, whichever is greater.
- 4. Minimum Yards and Setbacks:
 - (a) Minimum building and parking setback along West Main Street: 50 feet
 - (b) Minimum building setback along collector and arterial streets (other than Main Street): 40 feet
 - (c) Minimum parking setback along collector and arterial streets (other than Main Street): 20 feet
 - (d) Minimum interior side and rear yard for parking along the easterly and northerly property lines of Pine Ridge Park: 5 feet

5. Signs

(a) Freestanding Signs

- (i) Number and Size:
 - (aa) Adjacent to Main Street:
 - One double-faced 200 sq. ft. sign at the full access on Main Street;
 - One double-faced 100 sq. ft. sign at the right-in-right-out on Main Street;
 - Five monument signs (one for each outlot, fronting Main Street) – 32 sq. ft. size, with maximum height not to exceed 8 feet above grade.
 - (bb) Adjacent to Woodward Drive: One double-faced freestanding monument sign is permitted for each lot – 32 sq. ft. in size with a maximum height of 8 ft. above grade.
- (ii) Setback: All freestanding signs shall be setback from the nearest right-of-way a minimum of ten (10) feet.
- (iii) Exterior Materials and Design: The base, framing, and display area of a freestanding monument sign shall be architecturally compatible with the materials, colors and design of the building to which it is accessory. There shall be no restriction on the color or any lettering, logos, or other advertising on the sign.

(b) Other Provisions

- (i) Other signs including wall signs and awnings are permitted. The surface area of a sign or signs attached to a wall shall not exceed one and one half square feet for each linear foot of frontage of the wall on which the sign or signs are located. Lettering on awnings or canopies shall not exceed one square foot for each linear foot of frontage of the awning or canopy on which the lettering is located. In the case of a use which does not have any exterior wall frontage, the surface area of such sign shall not exceed one and one half (1.5%) percent of the floor area occupied by such use.
- (ii) There shall be no flashing lights or moving parts on any sign within the Commercial Parcel.
- (iii) Use of awning signage is encouraged to compliment and

harmonize with the building design, materials and colors.

- (iv) Temporary Signs shall comply with the provisions of Section 17.02.150 C. of the St. Charles Zoning Code, except as modified by the provisions of Exhibit "V" to this Ordinance.

6. Landscape Standards: Landscaping shall comply with the provisions of the St. Charles Zoning ordinance and with the following additional requirements:

(a) General Provisions

- (i) The preservation of existing trees and other vegetation shall be considered in the landscape design. Grading and other site improvements shall be designed so as to preserve existing trees whenever practical, while allowing permitted development, in accordance with the provisions of Chapter 8.30 of the St. Charles Municipal Code, "Tree Preservation on Private Property".
- (ii) Landscape design shall provide for appropriate proportion, balance, unity, variety of species, and variety of color and texture evident throughout the four seasons.
- (iii) Landscaping materials native to the region shall be used whenever feasible.
- (iv) Landscaping shall be designed to complement the massing of buildings, screen parking and service areas, and to provide visual relief.
- (v) Landscaping shall be designed so as to reduce the intrusion of headlights and other glare.
- (vi) Landscaping shall be designed with attention to the long-term maintenance of the plant materials. Irrigation systems shall be installed when necessary to ensure long-term maintenance.
- (vii) Earth mounds and berming are encouraged, where appropriate. Berms should be no steeper than a 1 to 3 proportion.

(b) Parking Lot and Vehicle Use Area Internal Planting

- (i) Landscape islands shall be provided so that not more than 20 consecutive parking spaces adjoin each other.

- (ii) The minimum size of landscape islands shall be 9 feet in width and 18 feet in length, and should be graded to provide a crown of approximately 6-12 inches.
- (c) Building Foundation Landscaping
 - (i) Foundation plantings may be formal and uniform, or uneven and naturalistic. Foundation plantings should respond to the materials and form of a building.
 - (ii) Consideration of the mature size of plants is important in the design of foundation plantings. In particular, the relationship of the plant's mature size to the placement and size of windows, architectural features and the height of the building is important.
 - (iii) Foundation plantings for retail buildings should be installed where reasonably practicable across the front facade and along the building at the corner side yards, excepting entrance walks and drives, drive-in facilities and approaches, pedestrian areas and other such features and amenities which are not conducive to foundation plantings.
- (d) Landscaping Signage: Monument signs should have a landscape bed surrounding the base.

7. **Architectural Standards**

A. ***Articulation of Building Facades***

Intent: To reduce the apparent bulk of buildings and relate them to a human scale.

1. Building walls that are visually prominent as viewed from any public street, or from an internal circulation road that provides access to two or more buildings, should conform with the following standards:
 - a. Walls that are over one-hundred (100) feet in length should incorporate offsets, projections or recesses a minimum of three (3) feet in depth, extending over twenty percent (20%) of the façade, as measured in square feet of wall area.
 - b. Architectural features such as arcades, arbors, windows, doors, entryways, awnings, pilasters, cornices, decorative banding, and other decorative features should comprise at least fifty percent (50%) of visually prominent building walls, as measured in square feet of wall area.
2. All building walls that face the street should have at least two (2) of the following architectural features to avoid the appearance of blank walls facing the street:

- i. change in wall plane of at least two (2) feet,
 - ii. change in wall texture or masonry patterns,
 - iii. transparent windows,
 - iv. columns or pilasters.
3. Building entryways should offer protection from weather such as overhangs, awnings, canopies, etc.
4. Building design should include features to add identity and architectural interest such as projecting cornices, medallions, lighting fixtures, art work, belt courses of a different color or texture, pilasters, etc.
5. Predominant façade colors should be subtle, neutral or earth-tones. Primary colors, high-intensity colors, metallic or fluorescent colors, and black are prohibited as predominant façade colors. Building trim and accent areas may be brighter and include primary colors (as detailed in Section G. Colors, below).

B. Windows and Transparency

Intent: Allow people outside commercial buildings to see activity within, and allow people inside to see activity and weather conditions outside.

1. Retail buildings and tenant spaces with 30,000 square feet or less of gross floor area should provide windows so that the first floor is transparent from a height of eighteen (18) inches to a minimum of seven (7) feet above the walkway grade for no less than sixty percent (60%) of the horizontal length of the facade, and should include a public entrance. Windows shall be clear glass (no tinted or reflective glass), recessed or projected in the wall plane to create shadow and visual interest, and should include visually prominent sills or other appropriate forms of framing. Awnings, pilasters or columns may be used to accentuate window openings and add interest to the design of the building.
2. Development of the outlots should help define and enhance the character of the public street frontage by placing outlot buildings near the street with showcase windows and architectural features oriented toward the street as well as to the interior parking lot.

C. Building Entrances and Pedestrian Walkways

Intent: People should be able to tell where building entrances are located, and walking into the building should be a pleasant experience.

1. Buildings should have a public entrance on a façade that faces a public street or private drive that provides primary access.
2. All public entrances should be articulated from the building mass. Examples of such

articulation include: canopies or porticos, overhangs, arcades, raised corniced parapets over the door, peaked roof forms, arches, outdoor patio or seating areas, display windows, details such as tile work and moldings integrated into the building design, and integral planters or wing walls that include landscaping or seating.

3. Facades which abut parking areas and contain a public entrance should provide pedestrian walkways and foundation landscape areas parallel to the foundation not less than six (6) feet in width. Sidewalks in this area should have a minimum width of six (6) feet.
4. Pedestrian routes to building entrances should be marked with pavers, striping, or delineated by the design and location of landscape features.

D. Roof Design

Intent: Roofs should be designed to add visual interest to the building, to conceal necessary service equipment, and to establish the building's identity.

1. Roof lines should either be varied with a change in height or the incorporation of a major focal point feature, such as a dormer, gable or projected wall feature, minimum of every one-hundred (100) linear feet in building length.
2. Exposed roof materials shall be similar to, or an architectural equivalent of asphalt or fiberglass shingle, wood shingle, standing seam metal roof or better. The roof of any building may be flat.
3. Parapets should feature three-dimensional cornices or other shadow-creating detail elements along their tops.
4. Mansard roof designs are discouraged.
5. "Green roof" designs are encouraged.
6. Pipe stacks and similar appurtenances that are required by code and cannot reasonably be hidden should be concealed as much as possible by location and coloring.

E. Building Wall Materials

Intent: Buildings should be constructed of quality materials that reduce maintenance costs over the life of the building, relate to traditional building materials used historically in Kane County, and reinforce the character of the community. Approved and prohibited building materials are:

1. Approved Materials
 - a. Brick
 - b. Wood
 - c. Native or architectural cast stone

- d. Tinted and/or textured concrete masonry units
- e. Cement based Stucco
- f. Tilt-up concrete panels designed with an architectural pattern or a brick veneer are permitted; plain concrete panels are prohibited

2. Prohibited Materials

- a. Smooth-faced, untinted concrete masonry units
- b. Exterior Insulation Finish Systems
- c. Vinyl
- d. Plain tilt-up concrete panels

F. Screening of Mechanical Equipment

As viewed from ground levels at a variety of locations, all mechanical equipment located on the roof or around the perimeter of a structure shall be screened by a raised parapet or with a structure comparable and compatible with the exterior building materials.

- a) A raised parapet or other architectural feature that is an integral part(s) of the building may be required as screening for rooftop mechanical equipment or to soften rooftop views.
- b) Screening for rooftop mechanical equipment shall incorporate similar architectural features of the building and/or be constructed of a material and color compatible with other elements of the building.
- c) Incidental rooftop equipment deemed unnecessary to be screened by the Director of Community Development or a designee shall be of color to match the roof or the sky, whichever is more effective.
- d) Equipment used for mechanical, processing, bulk storage tanks, or equipment used for suppressing noise, odors, and the like that protrudes from a side of a building or is located on the ground adjacent to a building shall be screened from public view as much as practical with materials matching the design of the building. Where miscellaneous exterior equipment cannot be fully screened with matching building materials, landscaping may be used as additional screening.

G. Colors

Garish or bright accent colors (i.e., orange, bright yellow, or fluorescent colors) on any portion of the building such as trim, banding or patterns on walls, cloth or metal awnings, entryway features shall be minimized, but in no case shall such coloring exceed 10% of each wall area.

H. Compatibility within the Development

The buildings to be developed within the Pine Ridge Property shall be compatible and harmonious with each other in their exterior architectural design features. Compatibility of architectural design features may be achieved by similarity of some design elements, while allowing dissimilarity of others. Buildings shall be considered compatible if at least three of the following five design elements are similar, as determined by the City Council, when comparing any proposed building with the previously approved buildings:

- a. Type of materials (brick, stone, wood, metal, etc.)
- b. Colors and textures of exterior surfaces
- c. Architectural scale (size and height of buildings, both actual and perceived)
- d. Placement and rhythm of doors, windows, wall planes, visible wall joints, and visible roof elements.

I. Refuse enclosures

Refuse enclosures should be made of the same building materials as the building they are to serve, and should be gated.
