## **Lexington Club / Concept Plan / Planning Summary**

The Lexington Club is an approved 130 unit PUD containing 27.3 acres. The northeast approximate 5.7 acres is zoned RT-3 and is approved for 28 single family detached lots. The remaining 21.6 acres is zoned RM-2 and is approved for 102 attached single family (townhome) units.

The proposed Concept Plan contemplates amending the current PUD for a 112 unit all single family detached development on the entire site. The RM-2 portion of the property is proposed to be rezoned to RT-3 with certain deviations to the bulk standards from table 17.12-2 as shown in the Residential Zoning Compliance Table, some deviations of which have been previously granted on the approved plan. In addition, in order to accommodate the proposed product, deviations from section 17.22.02-B regarding Detached and Attached Garages Accessory to One and Two Family Dwellings is proposed for Item 5 to allow the width of a front facing attached garage to be 66.7% vs the required 50% of the overall width of the dwelling and item 6 to allow the proposed architectural elevation details as a substitute for requiring a front facing garage to be setback 5 ft. from the front of the main dwelling.

The prior approved plan demonstrated that utilities were both available and adequate to service the proposed development. The approved plan also included several planning elements that have been incorporated into the proposed Concept Plan as follows:

- The road pattern is almost identical to the approved plan
- The primary open space, stormwater management, and the State Street Creek preservation corridor areas are as engineered for the approved plan.
- The R.O.W. reservation along the west property line for the extension of Ryan Street to 12th Street has been relocated north as an extension of Mark Street.
- The pedestrian connections north to the railroad ROW, west to 12<sup>th</sup> Street and south to the park site are provided.

## **Lexington Club: St. Charles Single Family Homes**

The new BSB Design unique home plans are designed for the way people are living today and want to advance in the future. New homeowners consisting of first time buyers, empty nesters, move-ups and millennial's are searching for homes that value quality over quantity and emphasize efficiency, new technology, comfort and sophisticated detail. The homes are designed in both plan and elevation to be better, not bigger.

Each plan offers a variety of open room concepts and features creative and distinct relationships that are conducive to individual change and flexibility. Designing with fewer hallways and unused traditional formal rooms, the new method of home designs offer definitive family gathering and social spaces that drive unique and adaptive solutions for personal expression.

The narrow lot plan with the forward aligned garage allows the social and private rooms of the home to be aligned in larger connected spaces rather than designed linearly adjacent to the garage. Pulling the garage forward allows the home to grow behind it in creative new ways; deemphasizing the plan location of the garage rather than accentuating it as a central component. These exceptional layouts feature captivating thematic elevations enabling the new homeowners to not only choose a plan for their lifestyle but also individualize their home's exterior. A variety of different historical and trend setting exterior elevation styles are provided for each home design. With color, texture, detailed facades, multiple fenestration and door patterns, usable front porches and high quality material choices the streetscape will be diverse, uncommon and inventive. The individuality expressed through the creative plans and elevations will create a truly walkable and livable pedestrian friendly environment.

SUBJECT: Comparison of Site Traffic Generation

At the request of the City of St. Charles, Illinois, and at your direction, Kenig, Lindgren, O'Hara, Aboona, Inc. (KLOA, Inc.) prepared a trip generation comparison between the last reviewed plan and the most current plan. The last plan assumed 28 single-family homes and 102 multi-family homes. The new plan calls for 112 single-family homes.

Table 1 shows the estimated vehicle trip generation under the last reviewed plan.

Table 1

**SITE-GENERATED TRAFFIC VOLUMES OF LAST REVIEWED PLAN**

## Comparison of Site Traffic Generation for the Proposed The Lexington Club Development

The current plan now proposes only 112 single family homes. **Table 2** shows the estimated trip generation for the new plan.

Table 1

  - 2. In addition to the building materials requirements and restrictions listed in Section 17.06.050(F)(1) and 17.06.050(F)(2) of the Zoning Ordinance, all exterior siding materials on buildings constructed on the Subject Realty shall be cedar or equivalent wood or fiber cement siding and trim. f. Owner's Association:

The Applicant will create one or more Owners Associations and create a Master Declaration of Covenants, Conditions & Restrictions that clearly identifies all responsibilities of the Owners Associations with respect to the use, maintenance and continued protection of common open space and improvements in the development, including, but not limited to, stormwater management facilities. The Declaration shall also regulate modifications to building architecture following the initial construction of the development. Such Declaration shall be in a form reasonably acceptable to the City and shall be recorded immediately following the recording of the Final Plat of Resubdivision for the Subject Realty.

g. School and Park Contributions:

The Applicant has agreed to convey, and the St. Charles Park District has agreed to accept, the .09-acre parcel fronting on 9th Street shown as Lot 59 on the PUD Preliminary Plan. The remainder of the Park and School contribution shall be provided as cash in lieu of land contribution in accordance with the provisions of Title 16 of the St. Charles Municipal Code, as the same may be amended from time to time. If the bedroom count used to calculate the initial cash contribution changes, the amount of the contribution shall be adjusted at the time of building permit.

h. Inclusionary Housing:

The Applicant has requested a deviation to the requirements of Chapter 17.18 of the Zoning Ordinance, Inclusionary Housing, to enable the development to begin construction without designating any affordable units or providing a fee-in-lieu contribution. The deviation request is hereby granted conditioned upon the Applicant executing and complying with the attached Affordable Housing Agreement, attached at Exhibit "F" for the duration of the project build out. In the event the Applicant fails to comply with the Affordable Housing Requirement at any time during the project build out, the requirements of Chapter 17.18 shall apply to the remaining housing units to be constructed.

- i. Subdivision Improvements: The following shall be constructed as a part of the initial Land Improvements for the development:
  1. Installation of a 10 inch water main as shown on the PUD Preliminary Plans (generally along Mark Street from 6<sup>th</sup> Street to 9<sup>th</sup> Street, along 9<sup>th</sup> Street south to State Street, continuing to the existing 10" water main near Dean Street, to complete a 10" water main loop through the development site). Following acceptance of the water main by the City, the City shall reimburse the Applicant for the actual cost to install the portion of the water main located offsite, including the cost to resurface existing streets which are not required to be reconstructed as a part of the development. Improvements to be reimbursed and the total maximum reimbursement shall be as specified in Exhibit G.
  2. Full improvement of 9<sup>th</sup> Street from State Street north into the development site, improved to the same standards as the streets within the development, including curb and gutter, storm sewer, sidewalks, street trees, and street lighting.
  3. Installation of a 5 ft. wide sidewalk on the north side of State Street, between 9<sup>th</sup> and 7<sup>th</sup> Streets, connecting to existing sidewalks at both intersections.
  4. Installation of missing sidewalk segments on 7<sup>th</sup> Street north of State Street.
- j. Off-site traffic contribution: Prior to the 65<sup>th</sup> occupancy permit, the applicant shall deposit with the City a cash contribution of \$200,000 to be used for off-site street or intersection improvements, at the sole discretion of the City Council.
- k. Ryan Street Right-of-Way: As a part of the Final Plat of Subdivision for the project, the City shall vacate the existing Ryan Street right-of-way located east of 9<sup>th</sup> Street and convey title of the property to the applicant. The City shall retain easements over any public utilities existing in the right-of-way.
- l. Future Ryan Street extension: As a part of the Final Plat of Subdivision for the project, applicant shall dedicate right-of-way for a future Ryan Street extension at the western end of the site (shown on the PUD Preliminary Plans as Lot 54). This property shall be maintained by the Owner's Association for the development until such time the street is constructed and accepted by the City.

- m. Access Easements: As a part of the Final Plat of Subdivision for the project, the applicant shall provide public access easements for pedestrian paths shown on the PUD Preliminary Plans (paths connecting Ryan Street to 12<sup>th</sup> Street, Ryan Street to the St. Charles Park District site, and the two paths connecting Mark Street to the railroad right-of-way).
- n. Construction Route: Construction related traffic shall access the site by following a route from Main Street, to 9th Street, to State Street to 9<sup>th</sup> Street into the site. No construction traffic shall utilize Mark Street east of 5<sup>th</sup> Street; 5<sup>th</sup>, 6<sup>th</sup> or 7<sup>th</sup> Street south of the Subject Realty; or State Street east of 9<sup>th</sup> Street.
- o. Site Cleanup: Complete demolition and clearing of debris and structures and environmental remediation of the property shall occur in accordance with a schedule to be mutually agreed upon by the parties, as set forth in a separate development agreement with the City.
- p. The Applicant shall execute a Developer's Undertaking/Land Improvement Agreement in the City's standard form, and tender the security required therein prior to the recording of the Final Plat of Subdivision.
- q. Stormwater Special Service Area: Following recording of the Final Plat of Subdivision, the City shall initiate the formation of a Special Service Area for the purpose of maintaining and repairing stormwater management facilities and other facilities serving the Subject Realty. The Record Owner shall not sell or transfer ownership of any portion of the Subject Realty until such Special Service Area has been established. Such Special Service Area shall be of perpetual duration with a maximum rate sufficient to provide for maintenance, repair, and reconstruction of such facilities. Such Special Service Area may provide for maintenance by the City in the event that stormwater management facilities or other facilities are not adequately maintained by the Owner or successors.

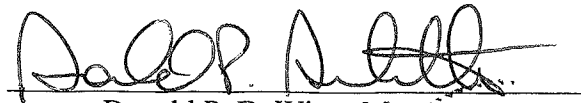

Section 6. That all ordinances and resolutions, or parts thereof, in conflict with the provisions of this Ordinance are, to the extent of such conflict, expressly repealed.

Section 7. That this Ordinance shall become effective from passage, approval and publication in pamphlet form as provided by law.

### FINDINGS OF FACT FOR MAP AMENDMENT

Plan Commission recommendation shall be based upon the preponderance of the evidence presented and the Commission shall not be required to find each Finding of Fact in the affirmative to recommend approval of an application for Map Amendment.

1. The existing uses and zoning of nearby property.

**The property is surrounded by both residential and manufacturing uses and zoning. Areas to the north and south of the site are primarily residential. Areas to the east and west contain a mix of residential and industrial land uses.**

2. The extent to which property values are diminished by the existing zoning restrictions.

**It is not known if the existing zoning restriction is diminishing property values in the area. Industrial uses are generally considered to be incompatible with single-family residential uses, which may cause property values surrounding the site to be diminished.**

3. The extent to which the reduction of the property's value under the existing zoning restrictions promotes the health, safety, morals or general welfare of the public.

**The current zoning restriction has not produced any perceptible public benefits during the last 5 years that the property has remained vacant. The property is in a deteriorated state and is environmentally contaminated. Under the existing zoning, the property could be developed with industrial uses that may be incompatible with the surrounding neighborhood, which is primarily residential.**

4. The suitability of the property for the purposes for which it is presently zoned, i.e. the feasibility of developing the property for one or more of the uses permitted under the existing zoning classification.

**The property is not well suited for industrial use. The property was originally used for industrial purposes because of its proximity to the railroad. The railroad line is no longer active and is in the process of abandonment. Access to the site requires use of minor streets and crossing through a residential neighborhood. The site has limited visibility from any arterial or collector street.**

5. The length of time that the property has been vacant, as presently zoned, considered in the context of the land development in the area where the property is located.

**Applied Composites closed and vacated the property in 2005. The property has remained vacant. Some of the structures on the site were torn down in 2008 and other structures were recently demolished in 2011. The area surrounding the site is mostly developed.**

6. The evidence, or lack of evidence, of the community's need for the uses permitted under the proposed district.

**Higher quality and better suited industrial sites surrounded by similar land uses are available elsewhere in the community. The proximity of the property relative to the Downtown area makes the property more desirable for residential use.**

7. The consistency of the proposed amendment with the City's Comprehensive Plan.

**In 2008 the City adopted an amendment to the Comprehensive Plan which designated a future land use for the site of "Medium Residential", with a gross density range of 2.5 to 6.5 dwelling units per acre. The proposed zoning districts of RT-2 (net 8.7 du/acre) and RM-2 (net 10 du/acre), after accounting for street rights-of-way and land for stormwater detention, will result in an overall gross density within the range recommended by the Comprehensive Plan.**

8. Whether the proposed amendment corrects an error or omission in the Zoning Map.

**No, the proposed amendment does not correct an error or omission in the Zoning Map.**

9. The extent to which the proposed amendment creates nonconformities.

**No non-conformities will be created by the Map Amendment.**

10. The trend of development, if any, in the general area of the property in question.

**There is no perceptible trend of development in the area. The subject property represents a substantial portion of the land area of the neighborhood and has been vacant for 5 years. The neighborhood surrounding the site is otherwise stable.**

### FINDINGS OF FACT FOR SPECIAL USE FOR PLANNED UNIT DEVELOPMENT

From the St. Charles Zoning Ordinance, Section 17.04.410.D.3:

The Plan Commission shall not favorably recommend, and the City Council shall not approve, a Special Use for a PUD or an amendment to a Special Use for a PUD unless they each make findings of fact based on the application and the evidence presented at the public hearing that the PUD is in the public interest, based on the following criteria:

1. The proposed PUD advances one or more of the purposes of the Planned Unit Development procedure stated in Section 17.04.400.A:

1. To promote a creative approach to site improvements and building design that results in a distinctive, attractive development that has a strong sense of place, yet becomes an integral part of the community.

**The PUD Preliminary Plans provide for a modified grid street pattern connected to existing access locations. The development plan is more “suburban” in layout and building form than recommended in the Comprehensive Plan.**

2. To create places oriented to the pedestrian that promote physical activity and social interaction, including but not limited to walkable neighborhoods, usable open space and recreational facilities for the enjoyment of all.

**The PUD Preliminary Plans interconnect all existing streets that currently terminate at the site. Complete sidewalks systems connect with the existing sidewalk grid in the neighborhood. Off-site sidewalks will be constructed on 7<sup>th</sup> Street, 9<sup>th</sup> Street, and along State Street between 7<sup>th</sup> and 9<sup>th</sup> Street to complete the sidewalk grid between the site and the neighborhood. The PUD Preliminary Plans provide recreational facilities in the form of the pedestrian/bike path connections off site to a future regional trail on the railroad right-of-way, a trail to the St. Charles Park District park site, and a trail connecting to 12<sup>th</sup> Street.**

3. To encourage a harmonious mix of land uses and a variety of housing types and prices.

**The PUD provides residential land uses that are compatible with the adjacent residential neighborhood. The residential land uses are not compatible with isolated industrial properties that adjoin the site. However, the Comprehensive Plan recommends a future land use of “Medium Residential” for the properties at 229 N. 9<sup>th</sup> Street and 602 N. 12<sup>th</sup> Street.**

**The PUD provides two different housing types within the site, but with limited variation within each category. The PUD does not provide any affordable residential units, which is a requirement of the Zoning Ordinance.**

4. To preserve native vegetation, topographic and geological features, and environmentally sensitive areas.

**The property has been previously developed. The PUD Preliminary Plans generally leave the State Street Creek and wooded areas south of the creek undisturbed.**

5. To promote the economical development and efficient use of land, utilities, street improvements, drainage facilities, structures and other facilities.

**The PUD Preliminary Plans include engineering plans for infrastructure facilities to serve the site. The plans follow City Code requirements for subdivisions and stormwater management. The Illinois EPA will require that environmental contamination of the property be remediated prior to development for residential use.**

6. To encourage redevelopment of sites containing obsolete or inappropriate buildings or uses.

**The Planned Unit Development will facilitate the redevelopment of a vacant site containing obsolete and deteriorated site improvements.**

7. To encourage a collaborative process among developers, neighboring property owners and residents, governmental bodies and the community.

**Neighborhood meetings were held in 2006 and 2007 to consider the future land use of the subject property. A Comprehensive Plan amendment was reviewed and adopted by the City Council in 2008.**

**Consideration of this development as a PUD has allowed a public hearing process and input from neighboring property owners and residents, governmental bodies, and the community. The PUD was discussed during Concept Plan review meetings before the Plan Commission and Planning and Development Committee of the City Council in 2008 and 2009. The Plan Commission held 2 public hearings to review the PUD.**

2. The proposed PUD and PUD Preliminary Plans conform to the requirements of the underlying zoning district or districts in which the PUD is located and to the applicable Design Review Standards contained in Chapter 17.06, except where:
  - A. Conforming to the requirements would inhibit creative design that serves community goals, or
  - B. Conforming to the requirements would be impractical and the proposed PUD will provide benefits that outweigh those that would have been realized by conforming to the applicable requirements.

Factors listed in Section 17.04.400.B shall be used to justify the relief from requirements:

1. The PUD will provide community amenities beyond those required by ordinance, such as recreational facilities, public plazas, gardens, public art, pedestrian and transit facilities.

**The PUD Preliminary Plans provide recreational facilities in the form of the pedestrian/bike path connections off site to a future regional trail on the railroad right-of-way, a trail to the St. Charles Park District park site, and a trail connecting to 12<sup>th</sup> Street. Off-site sidewalks will be constructed on 7<sup>th</sup> Street, 9<sup>th</sup> Street, and State Street.**
2. The PUD will preserve open space, natural beauty and critical environmental areas in excess of what is required by ordinance or other regulation.

**The PUD Preliminary Plans will leave the wooded area south of State Street Creek mostly undisturbed.**
3. The PUD will provide superior landscaping, buffering or screening.

**The PUD Preliminary Plans provide landscaping in compliance with the City's Zoning Ordinance. Landscape buffering is provided along the property lines adjoining existing industrial uses.**

4. The buildings within the PUD offer high quality architectural design.

**The single-family detached houses are traditional in form as recommended by the Comprehensive Plan, however the buildings are uniform in terms of mass and orientation on the lot. Garages are set back from the façade and porches are provided on some elevations. The elevations have varied architectural style treatments.**

**The townhome buildings are more suburban in form than recommended by the Comprehensive Plan, with garage entrances on the front elevations. The architectural elevations for the townhomes include more articulation, detailing, and variation in building materials and textures than is required by the Design Standards of the Zoning Ordinance. The PUD proposes elevations with masonry materials that do not continue around the entire building, which deviates from the Design Standard of continuous materials on all elevations. The PUD proposes two townhome buildings containing six units attached in a row, which exceeds the Design Standard maximum of five units attached in a row.**

5. The PUD provides for energy efficient building and site design.

**Energy efficient features of the building and site design have not been identified.**

6. The PUD provides for the use of innovative stormwater management techniques.

**The PUD Preliminary Plans include a stormwater management system in compliance with City Code requirements. The property is not currently served by a stormwater management system. The detention basins will be naturalized, which can improve water quality.**

7. The PUD provides accessible dwelling units in numbers or with features beyond what is required by the Americans with Disabilities Act (ADA) or other applicable codes.

**No accessible dwelling units have been proposed as part of the PUD.**

8. The PUD provides affordable dwelling units in conformance with, or in excess of, City policies and ordinances.

**The PUD deviates from the requirements of the City's Zoning Ordinance with respect to providing affordable dwelling units. The PUD does not include any affordable dwelling units and no fee-in-lieu of constructing the units is proposed. The developer will follow the recommendation of the City's Housing Commission to actively seek grant funding assistance that can reduce the cost of the residential units to a level that is closer to a level considered "affordable" by the City's Zoning Ordinance.**

9. The PUD preserves historic buildings, sites or neighborhoods.

**The proposed PUD is not within a Historic District, but is located approximately two blocks from the Central Historic District. The property is a former industrial facility that is located within an older neighborhood which contains two designated Landmark buildings located approximately two blocks south of the subject property. The buildings and other site improvements on the subject property have not been identified as having any unique historic value and have been substantially demolished.**

3. The proposed PUD conforms with the standards applicable to Special Uses (section 17.04.330.C.2):

From the Charles Zoning Ordinance, Section 17.04.430.C.2:

No Special Use or amendment to Special Use shall be recommended by the Plan Commission unless it finds that the proposed Special Use or amendment to Special Use will conform with each

of these standards. The Plan Commission shall submit its written findings together with its recommendations to the City Council after the conclusion of the Public Hearing, and also may recommend such conditions as it may deem necessary to ensure conformance with these standards.

On the basis of the evidence presented at the public hearing, the Plan Commission shall record its reasons for recommending approval or denial of the petition (findings of fact) in accordance with the following standards:

- A. Public Convenience: The Special Use will serve the public convenience at the proposed location.

**The location is desirable for residential development due to its proximity to downtown. The Comprehensive Plan recommends more residential housing in close proximity to downtown to enhance the Downtown's viability.**

- B. Sufficient Infrastructure: That adequate utilities, access roads, drainage and/or necessary facilities have been, or are being, provided.

**The following studies have been completed to determine infrastructure improvements necessary to support the development:**

- **Traffic Impact Study prepared by KLOA dated September 27, 2011, indicates that adequate access roads will be provided.**
- **Water Supply Modeling Study prepared by Trotter and Associates dated December 27, 2010 indicates that adequate water supply will be provided.**
- **Sanitary Sewer Evaluation prepared by Wills Burke Kelsey Associates dated December 17, 2010 indicates that adequate sanitary sewer utilities will be provided.**

**PUD Preliminary Engineering Plans have been reviewed by City staff for compliance with City Codes and Ordinances, including the Kane County Stormwater Ordinance. Based on these reviews, adequate on-site utilities, access roads, drainage, and related facilities have been provided on the plan documents.,**

- C. Effect on Nearby Property: That the Special Use will not be injurious to the use and enjoyment of other property in the immediate vicinity for the purposes already permitted, nor substantially diminish or impair property values within the neighborhood.

**Evaluations and studies were conducted to identify potential impacts of the proposed development. The studies, which were entered into the record at the public hearing, identified any necessary improvements or measures to be taken to mitigate those impacts, and concluded with these improvements or measures, there would be no negative effect on nearby property.**

**With respect to traffic, there was significant testimony regarding existing delays encountered for vehicles exiting the neighborhood on to IL Route 64 and IL Route 31. The proposed development is expected to increase these delays. The traffic study for the project concluded that all intersections analyzed would operate at an overall acceptable level of service in 2015 when the project is fully constructed. However, the study also identified that the level of service for individual traffic movements out of the neighborhood and on to IL Route 64 and 31 would be degraded to an unacceptable level for certain locations. The developer will provide a contribution for off-site traffic**

**improvements in the amount of \$200,000 to be used for improvements to these intersections, as determined by the City.**

**Residential land uses surrounding the subject property are compatible and complementary to the land uses proposed for the PUD. The PUD will not diminish or impair residential property values in comparison to the existing property value and condition of the site.**

**Existing industrial land uses surrounding the subject property are not compatible with the proposed land uses for the PUD. The isolated industrial properties surrounding the site are already located in close proximity to other residential uses. The industrial properties located immediately to the west and south have existing legal non-conforming building setbacks from the development site. The Zoning Ordinance requires that where two incompatible uses adjoin along a property line, buffering and screening are the responsibility of the more intensive use (the industrial property). Any future development of the industrial sites under the existing zoning will require additional buffering and screening.**

- D. Effect on Development of Surrounding Property: That the establishment of the Special Use will not impede the normal and orderly development and improvement of the surrounding property for uses permitted in the district.**

**Evaluations and studies were conducted to identify potential impacts of the proposed development. The studies, which were entered into the record at the public hearing, identified any necessary improvements or measures to be taken to mitigate those impacts, and concluded with these improvements or measures, there would be no negative effect on surrounding property.**

**Residential land uses surrounding the subject property are compatible and complementary to the land uses proposed for the PUD, as discussed in Item C. above.**

**Industrial land uses surrounding the subject property are not compatible with the proposed land uses for the PUD, as discussed in Item C. above.**

- E. Effect on General Welfare: That the establishment, maintenance or operation of the Special Use will not be detrimental to or endanger the public health, safety, comfort or general welfare.**

**Evaluations and studies were conducted to identify potential impacts of the proposed development. The studies, which were entered into the record at the public hearing, identified any necessary improvements or measures to be taken to mitigate those impacts, and concluded with these improvements or measures, there would be no negative effect on surrounding property.**

**For the reasons stated under Item C. above, further traffic analysis is recommended.**

- F. Conformance with Codes: That the proposed Special Use conforms to all existing Federal, State and local legislation and regulation and meets or exceeds all applicable provisions of this Title, except as may be varied pursuant to a Special Use for Planned Unit Development.**

**The PUD complies with all City Codes, with the exception of any Zoning Ordinance deviations requested through the Planned Unit Development. The City will not authorize the construction of residential dwelling units on the property until the Illinois Environmental Protection Agency issues No Further Remediation letter(s) indicating that the site has been appropriately cleaned of environmental contaminants.**

4. The proposed PUD will be beneficial to the physical development, diversity, tax base and economic well-being of the City.

**The City has adopted policy through the Comprehensive Plan to support development of the subject property with residential uses within a specified density range. The proposed development meets this objective and is within the recommended density range.**

5. The proposed PUD conforms to the purposes and intent of the Comprehensive Plan.

**The subject property is classified in the Comprehensive Plan, Future Land Use Map #14 as "Medium Residential." The PUD Preliminary Plans conform to the Future Land Use Designation.**

**The Comprehensive Plan includes the following Goals and Objectives to be used when evaluating development proposals in this location:**

*Provide for future redevelopment while preserving the character of the surrounding neighborhood*

- *Maintain the existing typology of the surrounding residential neighborhood through the interconnection of streets and similar types of housing styles.*
- *Residential housing in close proximity to Downtown St. Charles is encouraged, to provide residents the opportunity to enjoy downtown amenities and to enhance Downtown's viability.*
- *Provide buffers or transition areas between different uses such as industrial and residential.*
- *Locate any areas of redevelopment that have a higher density away from existing lower density development, and provide appropriate transitions between dissimilar uses.*
- *Avoid land use and street patterns that result in heavy trucks using residential streets to access industrial or retail businesses.*

**The development provides interconnected streets. The architectural style treatments are similar to those in the neighborhood; however the building forms are dissimilar to those found in the neighborhood. The development is more regular and uniform than the existing neighborhood.**

**Higher density townhomes have been located adjacent to the neighboring industrial uses.**

**Only limited buffers and transition areas have been provided adjacent to the isolated industrial uses on 9<sup>th</sup> and 12<sup>th</sup> Streets. The Comprehensive Plan recommends a long term future land use of “Medium Residential” for these properties.**

*Provide Public open space to serve the neighborhood needs*

- *Look for opportunities to address changes to State Street Creek where possible.*
- *Provide for adequate park space to serve local needs.*

**No changes are proposed to State Street Creek. Stormwater basins will be constructed north of the creek. Most trees will be preserved on the south side of the creek.**

**The subject property represents the most significant development site within the neighborhood, and therefore is the only opportunity for a significant park land donation. The St. Charles Park District has acquired the 2.76 acre site located at 229 N. 9th Street, to be called “Belgium Town Park”. The Park District will accept a small parcel on 9th Street as a land donation to improve access to the Belgium Town Park site. The rest of the requirement will be met as a cash donation to the Park District that can be used to improve the park.**

**The City’s Subdivision Ordinance requires a land or cash donation based on the expected population of the subdivision (Population of 307, with a requirement at 10 acres per 1,000 population, equals a donation size of 3.07 acres). The park site acquired by the Park District is less than the recommended preferred size for the proposed development. A private park for the residents of the PUD is proposed on the north side of Mark Street between 5<sup>th</sup> and 6<sup>th</sup> Streets.**

*Provide a range of housing that is available, accessible and affordable*

- *Maintain the quality of the existing housing stock.*
- *Look for opportunities to add Senior housing to the area.*
- *Require high quality construction for new development.*
- *Promote subdivision design that creates desirable and cost efficient residential neighborhoods.*

**The PUD provides two distinct housing types- single-family detached houses and townhome units. No units are specifically designed to be accessible. No units are considered “affordable” by the City’s Zoning Ordinance. No units have been designed specifically for senior housing.**

**In terms of construction and design quality, the proposed townhomes comply with the City’s Design Standards, with deviations requested to allow the use of masonry materials on front and side elevations only.**

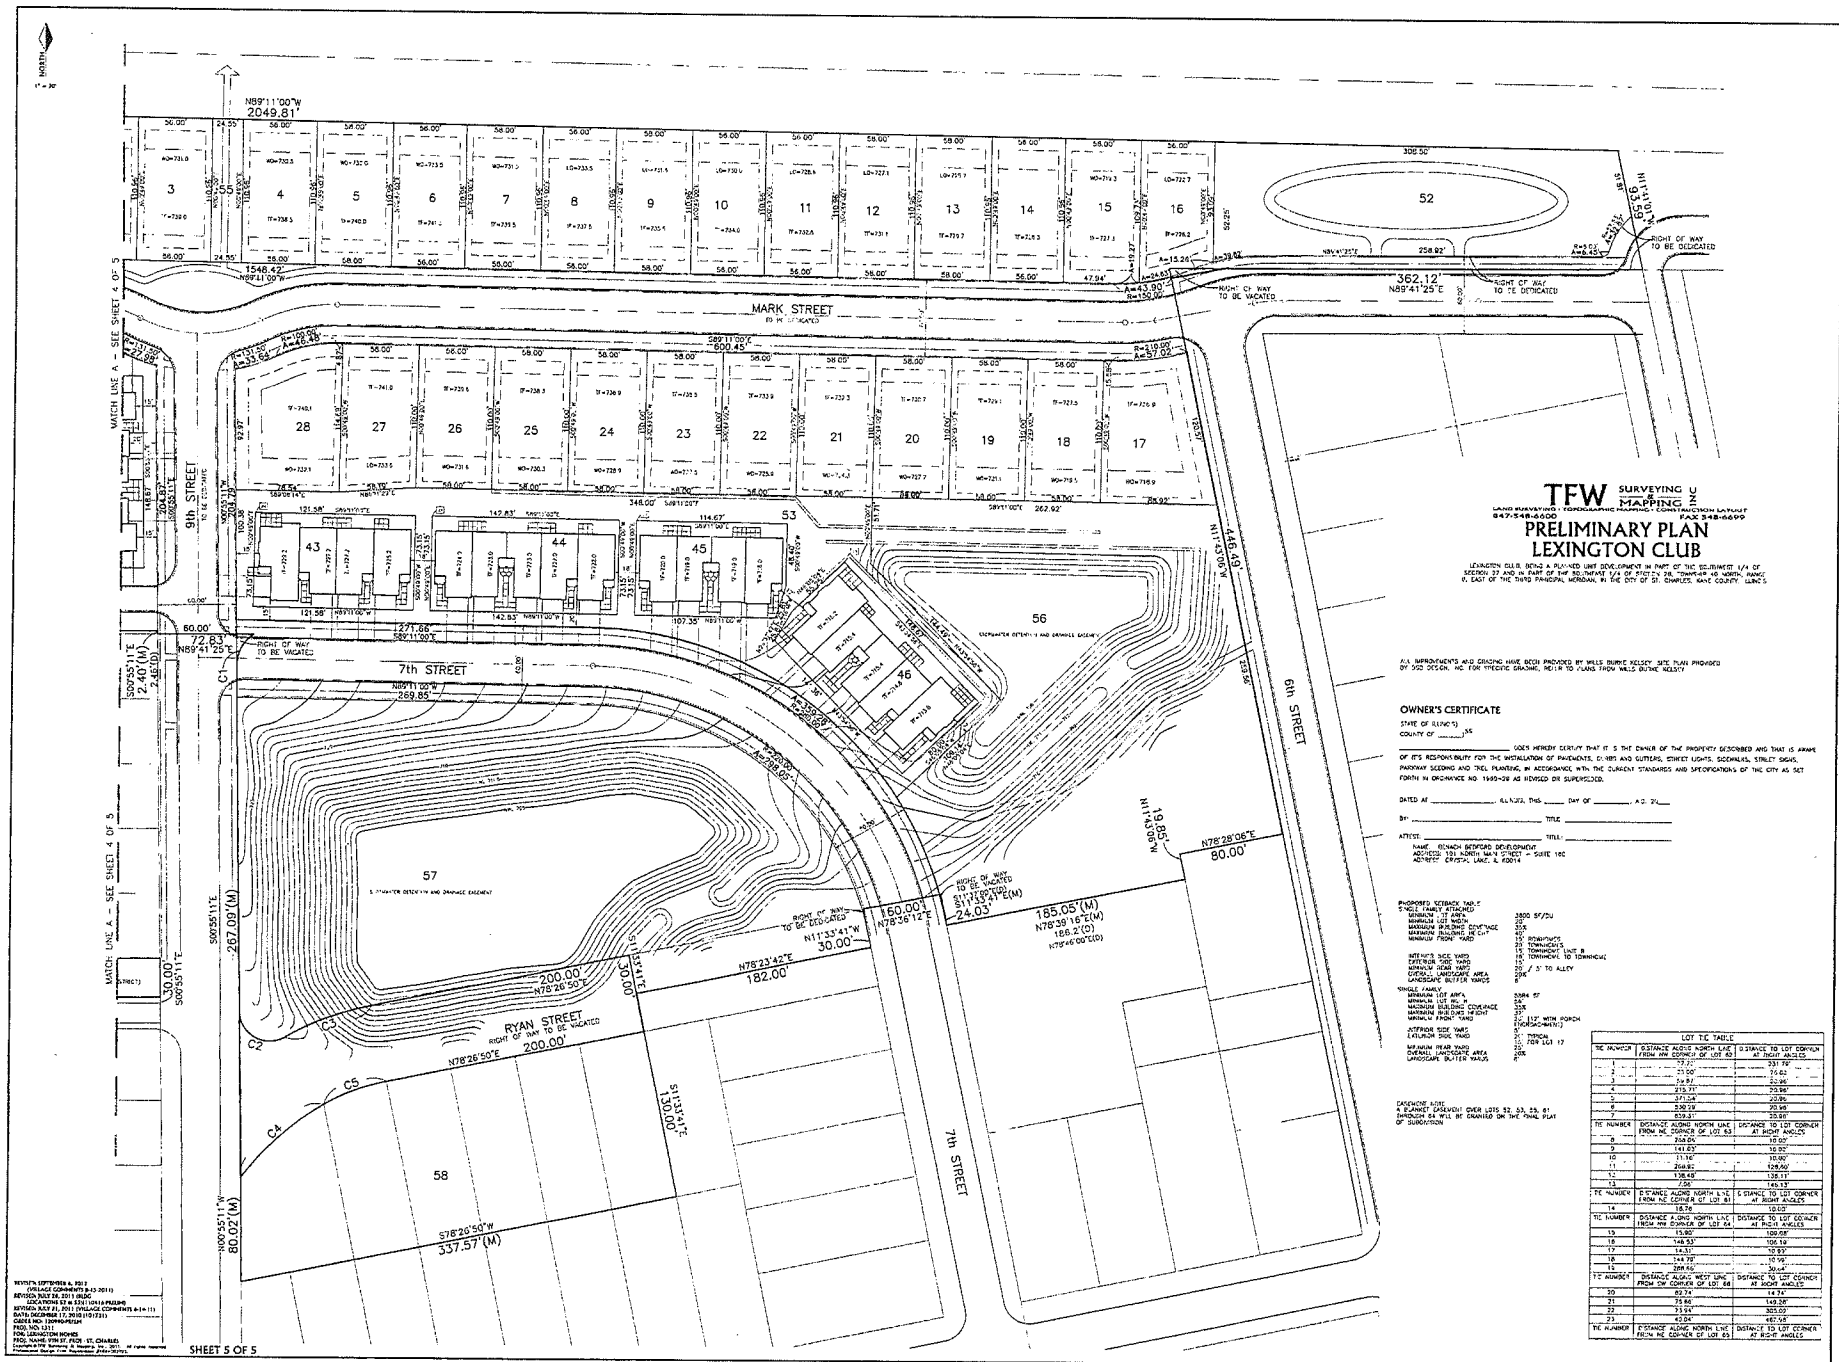

**The overall subdivision layout is desirable, but it is unknown how cost efficient the development plan is without comparison to an alternate plan.**

## EXHIBIT "F"

### AFFORDABLE HOUSING AGREEMENT

This Affordable Housing Agreement (hereinafter referred to as the "Agreement") is made and entered into as of the \_\_\_\_ day of \_\_\_\_\_, 2013, by and between the City of St. Charles, a municipal corporation (the "City"), organized and incorporated under the laws of the State of Illinois and Lexington Homes, LLC, an Illinois limited liability company (the "Developer"; the City and the Developer each known individually as a "Party" and collectively as the "Parties").

### RECITALS

**WHEREAS**, the Developer is the owner of the real estate legally described on Exhibit "A", attached hereto and made a part hereof (the "Subject Realty"); and

**WHEREAS**, the Developer has filed applications with the City regarding the Subject Realty for, among other things, (a) a zoning map amendment, (b) a special use for a planned unit development, and (c) certain deviations from the City's Zoning Ordinance, in order to allow construction of a residential development consisting of 102 two-story townhomes and 28 single family detached homes, all as more specifically described in Ordinance No. 2013-Z-\_\_\_\_, passed by the City on \_\_\_\_\_, 2013 (the "Project"); and

**WHEREAS**, one of the deviations requested by the Developer is exemption from the requirements of Chapter 17.18 of the City's Zoning Ordinance regarding inclusionary housing; and

**WHEREAS**, as a condition of approving such a deviation, the Developer is required to take certain actions to seek funding for providing Affordable Housing (as defined in the Zoning Ordinance) on the Subject Realty, and to enter in to this Agreement in connection therewith.

**NOW, THEREFORE**, in consideration of the foregoing premises and in further consideration of the mutual covenants, conditions and agreements herein contained, the Parties hereto agree as follows:

**Section 1. Incorporation of Recitals.** The recitals set forth in the foregoing recitals are material to this Agreement and are hereby incorporated into and made a part of this Agreement as though they were fully set forth in this Section 1, and this Agreement shall be construed in accordance therewith.

**Section 2. Application for Affordable Housing Funding.** Commencing with the execution of this Agreement, and until the last certificate of occupancy is granted for the Project, the Developer shall apply for grant funding for the purpose of obtaining financing for the construction of Affordable Housing as part of the Project. At a minimum, application shall be made to Kane County Office of Community Reinvestment, Illinois Housing Development Authority, and the U.S. Department of Housing and Urban Development for all programs for which the project may qualify.
